LAND UTILISATION STATISTICS

INTRODUCTION:

Land utilization Statistics (LUS) is the most important part of planning for better management of Agricultural sector. Moreover, parameters like area, production, average yield of agricultural crops are prepared on the basis of LUS. LUS are prepared based on secondary data supplied by Circle (Taluk) Revenue Authority of the State for each agriculture year ending June. The lowest unit of data collection is the Revenue Circle offices of the districts.

METHODOLOGY OF LAND UTILIZATION STATISTICS:

There are three parts of LUS which covers various crops. These are required to furnish the information to the Govt. of India (Ministry of Agriculture) in three different formats designed by the Ministry.

1. Classification of Land of the Geographical area of the District.
2. Source wise and Crop wise Irrigation data.
3. Area under different Crops grown in the State.

Geographical Area Classification abstract:- The revenue circles of the concerned district are in practice of maintaining an abstract register of land classification known as "Matikali Sangkhipta" which is required to update for each and every agricultural year by the revenue circle offices as per Land Record Manual of Revenue Department, Assam. The revenue circles are maintaining this abstract register classifying the area up to (9) nine classes only as per the guidelines of the Department. The nine classes are :- Forests, Area under Non-agricultural Uses, Barren and Un - culturable Land, Permanent Pasture and other Grazing Lands, Land under Miscellaneous Tree Crops, Culturable Waste Land, Fallow Lands other than Current Fallows, Current Fallows, Net Area Sown.

Irrigation abstract:- This abstract is also being maintained at Revenue Circle Offices from which source wise /Crop wise irrigation data are available for reporting as per "Land Record Manual" of Revenue Department. Due to lack of updation of these land records the Directorate of Economics & Statistics is facing difficulties to furnish revenue based figures to the Government of India in due time of reporting. In this regard, this Directorate of Economics & Statistics often uses the data of Irrigation Department Govt. Of Assam and from Agriculture Census, conducted in quinquennial basis, while preparing the LUS report yearly. The latest reported figure for the state pertains to 2019-20

Crop area abstract: The Crop area abstract is also maintained at circle level. The updation of this abstract is not being done by the Circle offices for a long time though the Govt. needs up to date information in this regard. Due to this, State Level Forecast Committee at final forecast stage faces challenges. However, the area of 38 Forecast crops are finalized in different steps i.e at Circle level, Sub-divisional, District and ultimately at State level forecast committee meetings. The areas of these 38 forecast crops are incorporated in the Crop Area Abstract. The latest available information pertains to the state is with reference to the year 2019-20. The area of other minor crops pertaining to the year 2019-20 are taken from the Directorate of Agriculture and included in the above abstract during the year of reference.

The above three sets of data on LUS are playing vital role for future agricultural planning. It requires rethinking so that the Revenue authority of the districts makes necessary efforts for regular submission of LUS data one copy to the Director of Land Records, Assam and another copy to the Directorate of Economics and Statistics, Assam as there is provision as per "Land Record Manual" of the Revenue Department of Assam.
