

GOVERNMENT OF ASSAM

Socio Economic Survey

SCH. 26.0: SURVEY OF PERSONS WITH DISABILITIES (ASSAM)

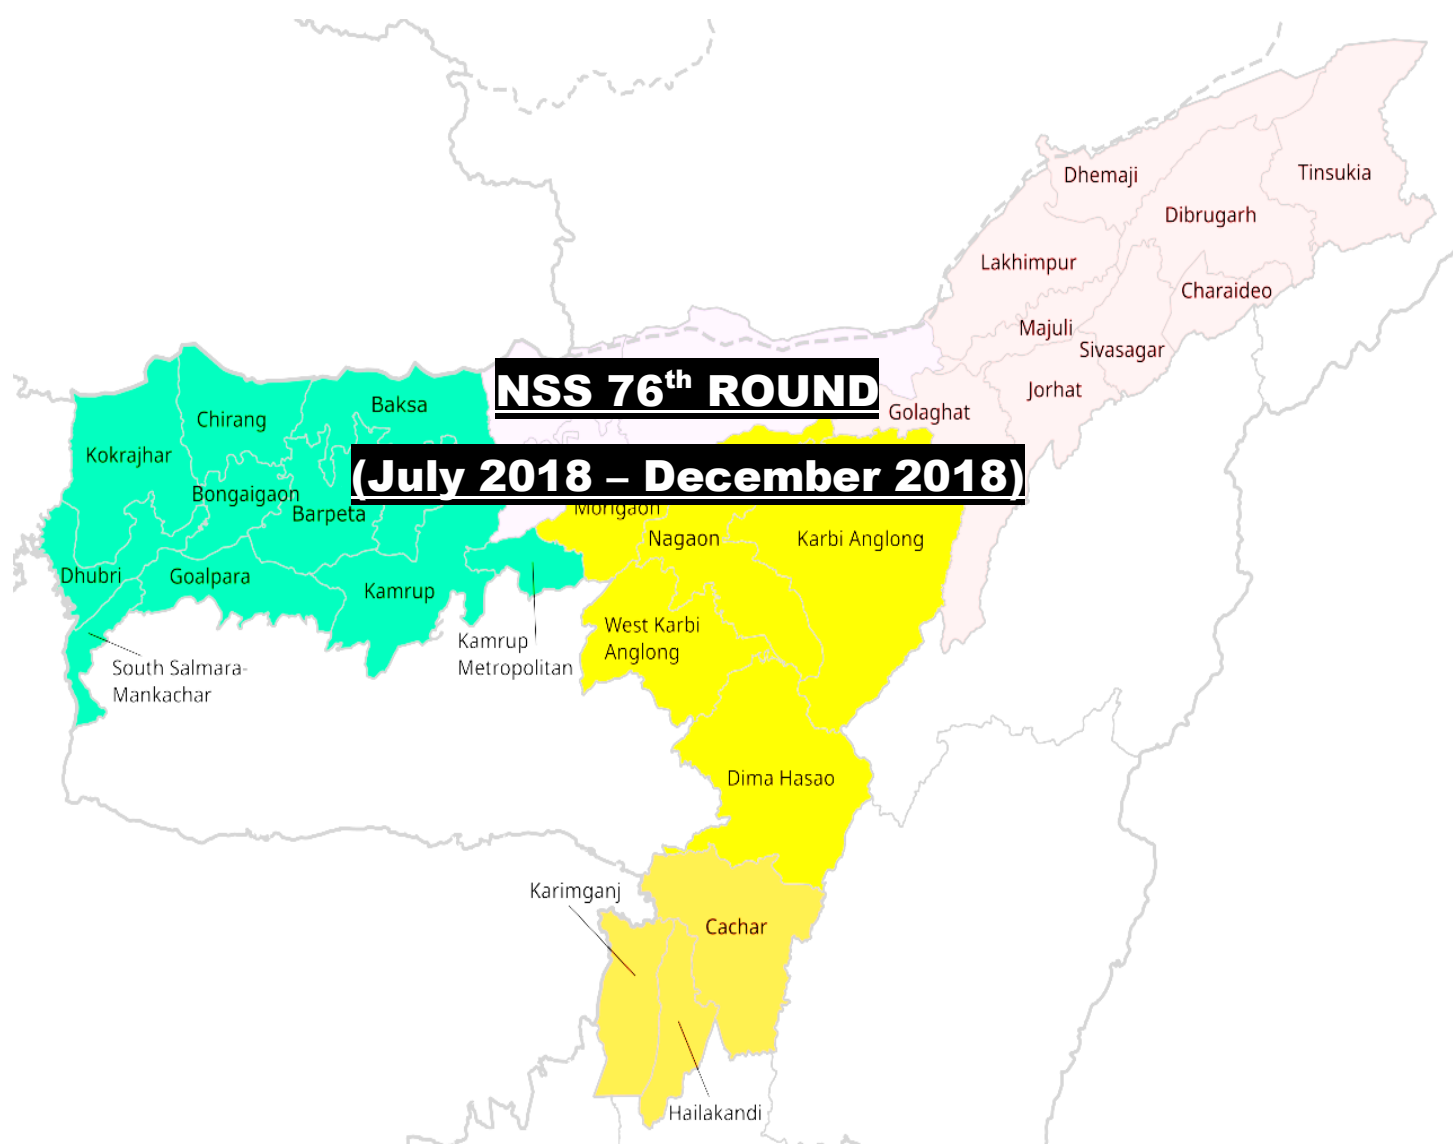

Report based on NSS 76th Round
(July 2018 - December 2018)

SURVEY DIVISION
DIRECTORATE OF ECONOMICS & STATISTICS

Report on
“SURVEY OF PERSONS WITH DISABILITIES IN ASSAM”
(DISTRICT- LEVEL RESULTS)

Survey Division
Directorate of Economics and Statistics
Government of Assam

PREFACE

The National Statistical Office (NSO) of the Ministry of Statistics and Programme Implementation, Government of India, routinely conducts comprehensive socio-economic surveys on various subjects. In the 76th round, conducted between July - December 2018, the NSO undertook a nationwide survey focused on 'Persons with Disabilities.' This survey aimed to estimate indicators of incidence and prevalence of disability, cause of disability, age at onset of disability, facilities available to the persons with disability, difficulties faced by persons with disability in accessing public building/public transport, arrangement of regular caregiver, out-of-pocket expense relating to disability etc.

To enhance the sample size and facilitate the preparation of estimates at the sub-state level, which could not be achieved with the 'Central Sample' alone, State Governments were invited to contribute matching samples. Consequently, Assam has been participating in the National Sample Surveys from the outset, employing the same methodology as the NSO.

The Directorate of Economics & Statistics, Assam collected data including the availability of amenities from the randomly selected households on various broad types of disability groups and all types of disabled persons were segregated through statistical methods during the 76th round. The report has been prepared by Statistical data analysis method.

The technical support provided by the NSO, Government of India, in designing the survey schedule and methodology is gratefully acknowledged. The dedication of supervisors and field staff, who worked diligently to ensure the success of the survey, is highly commendable. Additionally, the contributions of the report writers and other staff involved in the preparation of the report are sincerely appreciated. It is anticipated that this report will serve as a valuable resource for planners, policymakers, academics and researchers. Feedback for improving the content of the report is highly appreciated.

(Ms. Reena Mech I.A.S.)

Director of Economics and Statistics, Assam

ACKNOWLEDGEMENT

We would like to express our sincere gratitude to all the officers, staff, and members for their contributions to the publication of this book. The key members of the Directorate associated are:

Joint Director(Survey Division)	Suman Choudhury
Joint Director(Administration)	DigantaThakuria
Research Officer	Pradip Mohan
Statistical Officer	Akkas Ali Faruki Simanta Kumar Das Abhijit Phukan
Inspector of Statistics	Binita Debroy Gargi Borah
Sub-Inspector of Statistics	PrabinTeron Bijan Kumar Sarma Anima Devi
Junior Assistant	Pranoy Kumar Nath
Computer	Munindra Das
Field Assistant	Mamoni Mitra
Grade IV/MTS	Dhananjay Ray

Executive Summary (Sch.26.0)

According to the Assam Disability Census Report 2011, estimated disabled population of Assam is estimated at approx. 4 lakh 80 thousand out of which 2 lakh 57 thousand are male and 2 lakh 23 thousand are female.

1) Statement 1: It is observed that 228 villages and 72 UFS blocks were covered under the NSS 76th round survey of Persons with Disabilities. The total number of persons surveyed in rural was 9877 and 2200 in urban areas.

2) Statement 2: It is found that, in Assam, the average size of household has been reported as 4.6. Whereas, 4.6 in rural and 4.1 in the urban area. The sex ratio is reported as 837 (number of females per 1000 males) in Assam. While it is reported as 845 in rural and 788 in urban areas.

3) Statement 3: It reveals the estimated number of persons corresponding to each type of disability considering only one broad type of disability in Assam. We have observed that a higher value of 1054 no's corresponds to the persons suffering from only locomotor disability.

4) Statement-4: It shows that for any broad type of disability, the estimated number of persons with any disability has been considered irrespective of whether he/she has another broad type of disability or not. We have found that the highest value of 1101 now corresponds to the estimated number of persons with locomotor disability and mental retardation /intellectual disability is 175 which is at least one.

5) Statement 5: It indicates that the percentage of disabled persons who ever enrolled in ordinary school i.e. 53.5% is significantly high. However, the percentage of people who currently attend special schools is 0.7% which is very low in Assam.

6) Statement 6: It indicates that among the disabled persons belonging to the age group 3-35 years percentage of persons currently attending primary school i.e. 30.0% is highest among all the grades. On the other hand, the percentage of persons having educational status as currently graduate and above, i.e. 2.5% is least out of all grades.

7) Statement 7: From this statement, it is noted that 19.6% disabled persons of aged 15 years and above have the highest level of completed education secondary and above. Again, 0.8% of persons aged 15-59 years with disability have received formal vocational/technical training.

8) Statement 8: Here is the percentage distribution of persons who did not have disability since birth but by different ages at the onset of disability. It is noted that almost 60% of persons had having onset of disability in the age group 15 to 59 years which is significantly high. Again, in the specific age group of 0-4 years least percentage of persons become disabled after birth.

9) Statement 9: It is reported that about 50.3% of individuals with locomotor disability acquired it due to disease, followed by 36% due to other reasons, 11.2% due to injury other than burn, and 2.6% due to burn.

10) Statement 10: We have noted that almost 50% of disabled persons have a visual disability due to other reasons, while only 1.1% of disabled persons have a visual disability due to burn.

11) Statement 11: It is highlighted that more than 60% of persons have a hearing disability due to disease and only 2.4% of persons have a hearing disability due to burns.

12) Statement 12: This statement indicated that 59.0% of persons have speech and language disability due to other reasons whereas only 3.0% due to injury other than burn.

13) Statement 13: We observe that 65.5% of persons with disability took treatment by consulting a doctor which is significantly high. On the other hand 2.8% person did not take treatment since treatment was not available and only 2.3% of disabled persons did not take treatment since they could not afford it.

14) Statement 14: It is found that 60.8% of persons with locomotor disability were not advised aid/appliances whereas a minimum of 5.9% of persons with locomotor disability were advised aid/appliances but did not acquire it due to other reasons.

15) Statement 15: It indicates that among the persons with locomotor disability who acquired aid/appliance, the highest percentage of persons i.e. 74.3% acquired it through assistance from non-government organisations. Whereas 20.3% of disabled persons acquired it from others (NGOs, Charitable organisations, trusts or other philanthropic organisations).

16) Statement 16: It is noticed that out of the persons with locomotor disability, 31.2% of persons acquired another type of aid/appliance while 24.1% of persons acquired manual wheel chair. Additionally, only a small percentage i.e. 1.8% of persons acquired splint.

17) Statement 17: It represents the percentage of persons with visual disability by status of aid/appliances advised. Where 52.6% of persons come under the category who were not advised of any aid/appliances. While 23.9% of persons fall under aid/appliances advised and acquired it.

18) Statement 18: It is highlighted that the percentage of persons with a visual disability who acquired aid/appliance also using it regularly is 93.5% which is extremely high. Again, among the persons with visual disability who acquired aid/ appliances by the method of purchase is 79.5% which is the highest of all the methods.

19) Statement 19: It shows that about 50.4% of persons with a visual disability acquired high-powered glasses whereas 14.4% of persons acquired other aids/ appliances.

20) Statement-20: Here we have found that the percentage of persons with hearing disability who were not advised aid/appliances i.e. 48.9% is the highest one. Again, the percentage distribution of persons with hearing disability who advised aid/appliances but did not acquire them is 4.4% which the

least one.

21) Statement 21: Here the notable point of concern is that among the persons with hearing disability who acquired aid/appliance, the percentage of persons who have acquired aid/appliances by the method of purchase is 88.6% and by the method of assistance from the Government is 3.5% which is low.

22) Statement 22: It presents that the percentage distribution of persons with hearing disability who acquired hearing aids is 89.9%, which is the highest among all the types of aid /appliances. Whereas the percentage of persons acquiring other aid/appliances i.e. 10.1% is obtained as to be least.

23) Statement 23: It represents that among persons with locomotor disability in doing daily activities 40.6% persons did not require any personal assistance whereas 21.9% persons always required personal assistance in doing daily activities.

24) Statement 24: It displays that 40.3 % of persons with a visual disability did not require any personal assistance while 25.5 % of persons always required personal assistance in doing daily activities.

25) Statement 25: We have noted that 35.9% of persons always required personal assistance, and 32.6% of persons sometimes required personal assistance in doing daily activities.

26) Statement 26: We have observed that 42.8% of persons sometimes required personal assistance in doing daily activities, whereas, 31.5% of persons always required personal assistance in doing daily activities

27) Statement 27: It reveals the distribution of persons with another type of disability by the extent of personal assistance required in doing daily activities. 25.0 % of persons always required personal assistance in doing daily activities, whereas, 37.9 % persons sometimes required personal assistance in doing daily activities and 37.1% persons did not require any personal assistance in doing daily activities.

28) Statement 28: It indicates the percentage of persons with blindness who did not require personal assistance in doing daily activities is 41.9%. On the other hand, 27.2% of blind persons sometimes require personal assistance in doing daily activities

29) Statement 29: Here the percentage of persons with low vision who sometimes require personal assistance in doing daily activities is 48.0%. On the other hand, 14.9% of persons with low vision always required personal assistance in doing daily activities.

30) Statement 30: Here among persons with hearing disability by the extent of hearing disability, 49.6 % of persons cannot hear or can only hear loud sounds, whereas, 19.7% of persons have another hearing difficulty.

32) Statement 31: It shows that among persons with speech and language disability by extent of speech and language disability, 43.4 % persons cannot speak at all, whereas, 38.8% persons can speak only single words or speak unintelligibly and 17.8% persons have other speech and language difficulty.

33) Statement 32: Here the percentage of persons accessing/using public transport and public buildings has been presented. We have observed that 68.1% of persons accessed public transport and 63.5% of persons accessed public buildings during a period of the last 365 days preceding the date of the survey and faced difficulties in accessing/ using it. Whereas, 61.2% of persons with disability used public transport during the period of the last 365 days preceding the date of the survey and 63.5% of persons for public buildings.

34) Statement 33: It reveals that the percentage of persons with disability who did not receive aid/help is 66.5% and those who received aid/help from the government is only 17%.Also,35.9 % of disabled persons have a certificate of disability.

35) Statement 34: It depicts that about 25.2% of persons aged 15 years and above with disability were working before the onset of disability. Among those persons with disability who were working before the onset of disability, about 54.6% had lost their work and 19.6% had changed their jobs due to the onset of disability. Whereas, 25.8% of disabled persons had no loss or change of work.

36) Statement 35: It shows that about 46.1% of persons with disability were incurring out-of-pocket expenses. The average monthly out-of-pocket expenses per person with a disability who incurred out-of-pocket expenses on disability was estimated at Rs.1156/- in the state of Assam.

37) Statement 36: It is observed that about 26.4% of persons were under the labour Force Participation among persons with disability aged 15 years and above. About 25.4% working population ratio among persons with a disability.

37) Statement 37:It is to be noted that among the disabled persons engaged in the labour force, the percentage of all self-employed is 18.0%.Whereas the percentage of unemployed is very low i.e. only 1.0%and the percentage not in the labour force is significantly high i.e. 73.6%

It has focused on the percentage distribution of involvement of disabled workers of 15 years and above in different informal sectors. It is highlighted that most of the workers with a disability were engaged in the agriculture sector i.e. 51.4%, next to it in the Tertiary sector (33.3 %).

Again,5.2 % of persons with disability were engaged in non- agricultural sector.

Introduction

The survey of persons with disabilities provides the database regarding the incidence and prevalence of disability in the country along with various other indicators related to persons with disabilities. The statistical indicators derived based on the survey of persons with disabilities are required for planning and policy-making for the persons with disabilities. The results of the survey are useful to various stakeholders like the National Institution for Transforming India (NITI Aayog), the Ministry of Social Justice and Empowerment, the Ministry of Health and Family Welfare, different Institutes/Organisations, ESCAP, various researchers, etc.

1.1 Background & Perspective :

The 76th round survey was conducted from 1st July 2018 to 31st December 2018 under the technical guidance of NSSO, Directorate of Economics and Statistics, Assam. This report is based on Sch.26.0- 'Persons with Disabilities'. The survey on disabled persons (Schedule 26.0) was last conducted during the 58th round of NSS (July – December 2002). Information was collected from the households on the nature of the disability, viz. visual, hearing, speech and locomotors, of the household members. Along with these, mental disability was also considered in the 58th round.

1.2 Objective of Survey:

The main objective of the survey on "Survey of Persons with Disabilities" is to estimate indicators of incidence and prevalence of disability, cause of disability, age at onset of disability, facilities available to the persons with disability, difficulties faced by persons with disability in accessing public building/public transport, arrangement of regular caregiver, out-of-pocket expense relating to disability, etc. Further, estimates were obtained on various employment and unemployment particulars in usual status for the household members with at least one disability. For each of the household members aged 12 to 59 years, information was collected on whether receiving/received vocational/technical training. Also, for the household members with at least one disability who received formal vocational/technical training, information was collected on the field of training, duration of training, type of training, source of funding for the training etc.

Some of the important features of the Survey of Persons with Disabilities of NSS 76th round are given below:

- (i) Provision was made in Schedule 26.0 to classify persons with disabilities as per the classification used in the Rights of Persons with Disabilities Act (PWD Act) 2016.
- (ii) For the persons with disabilities, data were collected on the difficulty faced in accessing/ using public transport and accessing/using public buildings.
- (iii) For the persons with disabilities, information was collected whether having a certificate of disability and percentage of disability as per the certificate.
- (iv) For the persons with disabilities, information was collected on the arrangement of regular caregivers.
- (v) Information on out-of-pocket expenses relating to disability was recorded.
- (vi) For the persons with disabilities in the age group 3 to 35 years, information was collected on particulars of enrolment in education.
- (vii) For each of the household members with a disability, employment, and unemployment particulars were collected in usual status.
- (viii) For each of the household members of age 12 to 59 years with disability, information was collected on whether receiving/receiving vocational/ technical training. Moreover, for those who

received formal vocational/ technical training, further information was collected on the field of training, duration of the training, type of training, source of funding for the training, etc.

1.3 Geographical coverage: In 228 no of villages and 72 no of UFS blocks the survey was conducted in the state of Assam for the NSS 76th round Survey of Persons with Disabilities.

1.4 Classification of disabilities:

The detailed categories of the disabilities on which information was collected in this survey were as follows:

1. Locomotor disability	(i)	Acid attack victims.
	(ii)	Leprosy cured person.
	(iii)	Polio
	(iv)	Cerebral palsy
	(v)	Dwarfism,
	(vi)	Muscular dystrophy
	(vii)	Other locomotor disability
2. Visual disability	(i)	Blindness
	(ii)	Low vision
3. Hearing disability	(i)	Hearing disability
4. Speech and language disability	(i)	Speech and language disability
5. Mental Retardation / intellectual disability	(i)	Specific learning disabilities
	(ii)	Autism Spectrum Disorder
	(iii)	Other mental retardation / intellectual disability
6. Mental illness	(i)	Mental illness
7. Other disabilities	(a) Chronic neurological conditions	
		(i) Parkinson's disease,
		(ii) Multiple sclerosis,
		(iii) Other chronic neurological conditions
	(b) Blood disorder	
		(i) Thalassemia
		(ii) Haemophilia
		(iii) Sickle cell disease
8. Multiple Disabilities	(i)	More than one of the above-specified disabilities including deaf-blindness.

1.5 Procedure adopted for identification of disabled persons:

Disability of each broad category of disability was identified by using questions as follows:

a) Locomotor: For identification of the persons with locomotor disabilities, the following questions were used

1. Whether having difficulty in using hands, fingers, toes, or body movement (including cerebral palsy, and muscular dystrophy).
2. Whether having loss of sensation in the body due to paralysis, leprosy, or other reasons
3. Whether having deformity of the body part (s) like a hunchback, dwarfism, deformity due to leprosy, caused by acid attack, etc.

b) Visual: For identification of visual disability of the persons, the following question was used

- 1) Whether having difficulty in seeing, counting fingers of hand from a distance of 10 feet (with spectacles, if using, and both eyes taken together)

c) Hearing: For identification of hearing disability in the persons, the following question was used:

- 1) Whether having difficulty in hearing day-to-day conversational speech (without hearing aid, if using, and both ears taken together).

d) Speech and language disability: For identification of speech and language disability of the persons, the following question was used:

- 1) Whether having difficulty in speech (unable to speak like a normal person/ speech is not comprehensible, including laryngectomy, aphasia).

e) Mental retardation/ intellectual disability: For identification of mental retardation/ intellectual disability of the persons, the following questions were used

- 1) Whether having difficulty in understanding/comprehension or communicating in doing daily activities.
- 2) whether having difficulty in understanding/comprehension or communicating required in reasoning, making decisions, remembering, learning, and problem-solving.

f) Mental illness: For identification of mental illness of the persons, the following questions were used

- 1) Whether having unnecessary and excessive worry and anxiety, repetitive behaviour/ thoughts, changes of mood or mood swings, talking/laughing to self, staring in space.
- 2) Whether having unusual experiences of hearing voices, seeing visions, strange smells or sensations or strange tastes.
- 3) Whether having unusual behaviour or difficulty in social interactions and adaptability.

g) Other type of disability: For identification of other type of disability of the persons, the following question was used:

- 1) Whether having any of the following: Parkinson's disease, multiple sclerosis, other chronic neurological conditions, thalassemia, haemophilia, sickle cell disease.

2. CONCEPTS AND DEFINITIONS

The concepts and definitions of some important terms that were used to ensure uniformity during the listing of the households through listing schedule 0.0, canvassing of **schedule 26.0**, and in preparation of this report pertaining to NSS 76th round on survey of persons with disabilities were explained as below.

2.1. Household and household size

A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb “normally” means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-away (whose total period of absence from the household was expected to be less than 6 months) were included. For determining household and household members following guidelines prescribed by NSO under NSS 76th round was always kept in mind during listing and canvassing of **schedule 0.0** and **26.0** respectively.

- i. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., were considered to be a single-member household. The same principle applies to the residential staff of such establishments. However, if a group of persons among them pooled their income for spending, they were treated as forming a single household.
- ii. The more importance was given to “normally living together” than “sharing food from a common kitchen” in drawing the boundaries of a household. In case the place of residence of a person is different from the place of boarding, he or she will be treated as a member of the household with whom he or she resides.
- iii. A resident employee, domestic servant, or paying guest (but not just a tenant in the household) will be considered as a member of the household with whom he or she resides even though he or she is not a member of the same family.
- iv. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person’s family members was taken to include the person also.
- v. If a member of a family (say, a son or a daughter of the head of the family) stays elsewhere (say, in the hostel for studies or for any other reason), he/she will not be considered as a member of his/her parent’s household. However, he/she will be listed as a single-member household if the hostel is listed.

Household size is the total number of persons in the household i.e. the total number of persons normally residing together (i.e., under the same roof) and taking food from the same kitchen (including temporary stay-away and excluding temporary visitors).

2.2. Age

The age of the household members in completed years, as on the date of the survey was recorded.

2.3. Person with disability

As stated in the Rights of Persons with Disabilities Act, 2016 (henceforth referred to as PWD Act, 2016), the term '**Person with disability**' means a person with **long-term** physical, mental, intellectual or sensory impairment which, in interaction with barriers, hinders his full and effective participation in society equally with others.

'Barrier' means any factor including communicational, cultural, economic, environmental, institutional, political, social, attitudinal, or structural factors which hampers the full and effective participation of persons with disabilities in society.

2.4. Reference period for persons with disabilities

For the operational purpose in the NSS 76th round as well as for the proper interpretation of the results, the '**long term**' covered a period of 12 months or more. Thus, if the physical, mental, intellectual or sensory impairment existed for a period of 12 months or more or if such impairments are of recent origin but the nature of the impairments is such that these will last for a long term (12 months or more), the person was considered as a person with a disability. Some specific conditions like amputation of leg/arm, the victim of an acid attack, diagnosis of haemophilia, multiple sclerosis, Parkinson's disease, etc., even if were of recent origin were always considered as disabilities.

2.5. Classification of disabilities

For the survey of NSS 76th round on 'Persons with Disabilities', disabilities specified under the PWD Act 2016, were classified into eight broad groups. The detailed categories of the disabilities on which information was collected in this survey were as follows:

1. **Locomotor disability:** (i) acid attack victims, (ii) leprosy-cured person, (iii) polio, (iv) cerebral palsy, (v) dwarfism, (vi) muscular dystrophy (vii) other locomotor disability
2. **Visual disability:** (viii) blindness, (ix) low vision
3. **Hearing disability:** (x) hearing disability
4. **Speech and language disability:** (xi) speech and language disability
5. **Mental retardation/ intellectual disability:** (xii) specific learning disabilities, (xiii) autism spectrum disorder, (xiv) other mental retardation/intellectual disability
6. **Mental illness:** (xv) mental illness.

7. **Other disabilities:**

- a. chronic neurological conditions: (xvi) Parkinson's disease, (xvii) multiple sclerosis, (xviii) other chronic, neurological conditions,
- b. blood disorder: (xix) thalassemia, (xx) haemophilia, (xxi) sickle cell disease

8. **Multiple Disabilities:** (xxii) more than one of the above specified disabilities including deaf blindness

2.5.1. Locomotor disability

Locomotor disability implies a person's inability to execute distinctive activities associated with the movement of self and objects. For the Survey of Persons with Disabilities, the categories of locomotor disabilities were as follows:

Leprosy-cured person: A person who has been cured of leprosy but is suffering from (a) loss of sensation in hands or feet as well as loss of sensation and paresis in the eye and eye-lid but with no manifest deformity, (b) with manifest deformity and paresis but having sufficient mobility in the hands and feet to engage in normal activity, and (c) extreme physical deformity which prevents him/her from engaging in normal activity. A person was considered as a leprosy-cured person if a medical practitioner had such an opinion.

Cerebral palsy: Cerebral palsy means a group of non-progressive neurological conditions affecting body movements and muscle coordination, caused by damage to one or more specific areas of the brain, usually occurring before, during or shortly after birth. For the purpose of this survey, a person was considered to have cerebral palsy if the person was diagnosed as suffering from cerebral palsy by a medical practitioner.

Polio: An infectious viral disease that mainly affects children under 5 years of age. It affects the nervous system and can cause paralysis. The affected person may develop deformities of the limbs and spine. For the purpose of this survey, a person was considered to have polio if the person was diagnosed as suffering from polio by a medical practitioner.

Dwarfism: Dwarfism means a medical or genetic condition resulting in a very short-statured physique. A person of short stature with a normal-sized head but with a disproportionate bone formation like having short limbs and a long trunk or vice versa is considered to be a dwarf. Besides, those who are understood or known to be dwarfs are also considered as dwarfs.

Muscular Dystrophy: Muscular dystrophy is a group of hereditary genetic muscle diseases that weaken the muscles that move the human body. It is characterized by progressive skeletal muscle weakness, defects in muscle proteins, and the death of muscle cells and tissue. For the purpose of this survey, a person was considered to have muscular dystrophy if the person was diagnosed as suffering from muscular dystrophy by a medical practitioner.

Acid attack victim: An acid attack victim means a person disfigured due to violent assaults by throwing of acid or similar corrosive substance. If the informant reports that he/she was an acid attack victim, he/she was considered as an acid attack victim, irrespective of the extent of disfigurement.

Other locomotor disability: Those who are not classified in any of the categories (i) to (vi), (mentioned in an earlier paragraph under the classification of disabilities) but have problems in movements of self or objects were considered as persons with other locomotor disability. Those having locomotor disability due to hunchback, leprosy not cured, etc., were also included here. Persons with hunch back are those with deformities in the body (other than limbs) whose back is humped in a convex position because of abnormal spinal curvature.

2.5.2. Visual disability

The persons with any of the following conditions were considered as persons with visual disability.

- i. Cannot see at all.
- ii. Has no perception of light even with the help of spectacles.
- iii. Has perception of light but has blurred vision even after using spectacles, contact lenses etc. Such persons can, however, move independently with the help of remaining sight.
- iv. Can see light but cannot see properly to move about independently.
- v. Has blurred vision but had no occasion to test if her/his eyesight would improve after taking corrective measures.
- vi. In the case of (iii), (iv) and (v) above, to decide whether the person has a visual disability, it was confirmed whether the person can count the fingers of their hand from a distance of 10 feet in good daylight.

It may be noted that a one-eyed person not with any of the specific conditions mentioned above was not considered as a person with visual disability.

The persons with visual disability were further categorized in blindness and low vision mentioned as below.

Blindness: These are the persons (i) with no light perception or (ii) have light perception but cannot count fingers even with spectacles at a distance of 3 feet (both who normally use spectacles or those who normally do not use spectacles).

Low vision: These are the persons who have light perception but cannot count fingers even with spectacles up to a distance of 3 to 10 feet (both who normally use spectacles or normally do not use spectacles).

2.5.3. Speech and language disability

This refers to a person's inability to speak properly. A person with any one of the following conditions was considered as a person with speech and language disability:

- i. Cannot speak at all or she/he is unable to speak normally on account of certain difficulties linked to speech disorder. The speech of a person is judged to be disordered if the speech is not understood by the listener;

- ii. Able to speak in single words only and is not able to speak in sentences;
- iii. It also includes those whose speech is not understood due to defects in speech, such as stammering, nasal voice, hoarse voice discordant, voice articulation defects, etc.;
- iv. Permanent disability arising out of conditions such as laryngectomy or aphasia will also be considered as speech and language disability;
- v. A phase is an inability to comprehend and formulate language because of damage to specific brain regions;
- vi. Laryngectomy is the removal of the larynx and separation of the airway from the mouth, nose and oesophagus. If a person has a laryngectomy or are port of diagnosis with respect to aphasia, he will be considered as having speech and language disability. Diagnosis will mean a medical diagnosis by a medical practitioner.

2.5.4. Hearing disability

A person with any one of the following conditions was considered as a person with a hearing disability

- i. Cannot hear at all.
- ii. The person's inability to hear properly.
- iii. Has difficulty in hearing day-to-day conversational speech (hard of hearing).

If the person is using a hearing aid, the person is considered to have a hearing disability.

However, hearing problems in only one ear are not considered as having a hearing disability.

2.5.5. Mental retardation/Intellectual disability

This is a condition characterised by significant limitations both in intellectual functioning (reasoning, learning, problem-solving) and in adaptive behaviour which covers a range of every day, social and practical skills. These are as follows:

Specific learning disabilities: A heterogeneous group of conditions wherein there is a deficit in processing language, spoken or written, that may manifest itself as a difficulty to comprehend, speak, read, write, spell, or do mathematical calculations and includes such conditions as perceptual disabilities, dyslexia, dysgraphia, dyscalculia, dyspraxia and developmental aphasia. For the purpose of this survey, a person was considered to have specific learning disabilities if the person was diagnosed as suffering from specific learning disabilities by a medical practitioner.

Autism spectrum disorder: A neuro-developmental condition typically appearing in the first three years of life that significantly affects a person's ability to communicate, understand relationships and relate to others, and is frequently associated with unusual or stereotypical rituals or behaviours. For the purpose of

this survey, a person was considered to have autism spectrum disorder if the person was diagnosed as suffering from autism spectrum disorder by a medical practitioner.

Other mental retardation/ intellectual disability: Those who are not classified in any of the categories namely specific learning disabilities and autism spectrum disorder above but have significant limitation both in intellectual functioning (reasoning, learning, problem-solving) and in adaptive behaviour which covers a range of every day, social and practical skills was classified as persons with 'other mental retardation/ intellectual disability'

2.5.6. Mental illness

Mental illness means a substantial disorder of thinking, mood, perception, orientation or memory that grossly impairs judgment, behaviour, capacity to recognise reality or ability to meet the ordinary demands of life, but does not include retardation which is a condition of arrested or incomplete development of mind of a person, especially characterised by sub normality of intelligence.

2.5.7. Other type of disability

Disability caused due to:

a. Chronic neurological conditions

Multiple sclerosis: An inflammatory, nervous system disease in which the myelin sheaths around the axons of nerve cells of the brain and spinal cord are damaged, leading to demyelination and affecting the ability of nerve cells in the brain and spinal cord to communicate with each other. For the purpose of this survey, a person was considered to have multiple sclerosis if the person was diagnosed as suffering from multiple sclerosis by a medical practitioner.

Parkinson's disease: A progressive disease of the nervous system marked by tremors, muscular rigidity, and slow, imprecise movement, chiefly affecting middle-aged and elderly people associated with degeneration of the basal ganglia of the brain and a deficiency of the neurotransmitter dopamine. For the purpose of this survey, a person was considered to have Parkinson's disease if the person was diagnosed as suffering from Parkinson's disease by a medical practitioner.

Other chronic neurological conditions: If a person is diagnosed with any chronic neurological conditions other than those specified in (a) (xvi) and (a) (xvii) above, and having disability due to such conditions was considered to have a disability due to other chronic neurological conditions.

b. Blood disorder

Haemophilia: An inheritable disease, usually affecting only males but transmitted by women to their male children, characterized by loss or impairment of the normal clotting ability of blood so that a minor wound may result in fatal bleeding. For the purpose of this survey, a person was considered to have haemophilia if the person was diagnosed as suffering from haemophilia by a medical practitioner.

Thalassemia: A group of inherited disorders characterized by reduced or absent amounts of haemoglobin. For the purpose of this survey, a person was considered to have thalassemia if the

person was diagnosed as suffering from thalassemia by a medical practitioner.

Sickle cell disease: A hemolytic disorder characterized by chronic anaemia, painful events, and various complications due to associated tissue and organ damage; "hemolytic" refers to the destruction of the cell membrane of red blood cells resulting in the release of haemoglobin. For the purpose of this survey a person was considered to have sickle cell disease if the person has been diagnosed as suffering from sickle cell disease by a medical practitioner.

2.5.8. Multiple disabilities

Persons with more than one of the above-specified disabilities including deaf-blindness which means a condition in which a person may have a combination of hearing and visual disability causing severe communication, developmental, and educational problems.

2.6. People with different types of disabilities

Persons with only locomotor disability are those who have only locomotor disability and with no other disability. However, persons with locomotor disability are those who have locomotor disability with or without any other type of disability. Similarly, for each of the broad types of disabilities.

2.7. Person with multiple disability

Persons with more than one category of disability (i) to (xxi) defined earlier under the Classification of Disabilities (in 2.5) were classified as persons with multiple disabilities.

2.8. Operational guidelines for identifying disabilities

The following guidelines were adopted for identifying different types of disabilities during canvassing the schedule.

2.8.1. Guidelines for identification of persons with locomotor disability

Loss or absence or inactivity of whole or part of hand or leg or both due to amputation, paralysis, deformity or dysfunction of joints which affects his/her "normal ability to move self or objects";

- i. Able to move only with the help of walking aids.
- ii. Have acute and permanent problems of joints/muscles that have resulted in limited movement.
- iii. Not able to move or pick up any small thing placed nearby.
- iv. Have stiffness or tightness in movement.
- v. Have difficulty in balancing and coordinating body movements.
- vi. Have loss of sensation in the body due to paralysis or leprosy or any other reason;
- vii. Have any deformity of the body part(s) like having a hunch back?
- viii. Persons who are very short-statured (dwarf).

- ix. Persons with stiff necks of a permanent nature who generally do not have difficulty in the normal movement of body and limbs.
- x. Special care to be taken not to omit persons with cerebral palsy, muscular dystrophy and acid attack victims.

Guidelines for the identification of persons with a visual disability, speech & language disability and hearing disability were the same as mentioned earlier in **2.5.2, 2.5.3 and 2.5.4** respectively.

2.8.2. Some characteristics of mental retardation/intellectual disabilities for identification purpose

- i. Lacks understanding/comprehension as compared to her/his own age group;
- ii. Is unable to communicate her/his needs when compared to other persons of her/his age group;
- iii. Has difficulty in doing daily activities;
- iv. Has difficulty in understanding routine instructions;
- v. Has extreme difficulty in making decisions, remembering things or solving problems.

2.8.3. Some characteristics for identification of a person with mental illness

- i. Exhibits unnecessary and excessive worry and anxiety.
- ii. Exhibits repetitive (obsessive-compulsive) behaviour/thoughts.
- iii. Exhibits sustained changes of mood or mood swings (joy and sadness).
- iv. Has unusual experiences - such as hearing voices, seeing visions, experiencing strange smells or sensations or strange tastes.
- v. Exhibits unusual behaviours like talking/laughing to self, and staring into space.

2.8.4. Identification of some specific categories of disabilities

For the purpose of the NSS 76th round, in order to identify whether a person has a disability, a diagnosis by a medical practitioner was not necessary. However, to classify the disability of a person in the following specified categories, a report of medical diagnosis was necessary: (i) cerebral palsy, (ii) muscular dystrophy, (iii) specific learning disabilities, (iv) autism spectrum disorder, (v) multiple sclerosis, (vi) Parkinson's disease, (vii) other chronic neurological conditions, (viii) haemophilia, (ix) thalassemia, (x) sickle cell disease, (xi) polio.

2.9. Prevalence of disability

For the purpose of this report prevalence of disability is defined as the percentage of persons with disability in the population.

2.10. Incidence of disability

For the purpose of this report, the incidence of disability in the population is, the number of persons whose onset of disability (by birth or otherwise) had been during the specified period of 365 days preceding the date of the survey per 1,00,000 persons. This included those persons who did not have disability 'since birth' but whose disability commenced during the last 365 days preceding the date of the survey as well as persons whose onset of disability was since birth and whose age of the person was less than 1 year.

2.11. Place of occurrence of disability

Information on the place of occurrence of disability was collected for the persons with disabilities who had not had a disability since birth and for whom the cause of disability was burn or injury other than burn. This information was recorded for locomotor disability, visual disability, hearing disability and speech and language disability. The place of occurrence was (i) at the workplace (ii) on the road (iii) at home (iv) at other places.

2.12. Treatment taken/undergoing treatment

For the persons with disabilities information on 'treatment taken/undergoing treatment' in respect of the disability was collected.

2.13. Aid/appliances

Aid/appliances are assistive devices that can promote the physical, social and psychological independence of persons with disabilities by reducing the effects of disabilities. For the purpose of this survey, only those assistive devices that were in the nature of external appliances were considered as aid/appliances. Information on the type of aid/appliance, how aid/appliances were acquired and whether the aid/appliance was regularly used was recorded in respect of locomotor disability, visual disability, and hearing disability respectively.

2.14. The extent of personal assistance required in doing daily activities

Information on the extent of personal assistance required in doing daily activities by the household member with a disability was recorded for locomotor disability, visual disability, mental retardation/intellectual

disability, mental illness and another type of disability respectively. These were: always, sometimes, not required.

The extent of personal assistance required was considered as 'always' for those who were in the greatest need of personal assistance/help or who were unable to do activities due to disability without personal assistance.

For those who had difficulty in doing daily activities due to disability and sometimes needed personal assistance, for the extent of personal assistance required was considered as 'sometimes'.

For those who have difficulty in doing daily activities due to disability but need no personal assistance or those who have no difficulty in doing daily activities, the extent of personal assistance required was considered as 'not required'.

2.15. Extent of speech and language disability

For each household member with speech and language disability, the extent of speech and language disability was recorded. These were: (i) cannot speak, (ii) can speak only single words or speaks unintelligibly, (iii) have speech and language difficulty other than those in (i) and (ii)

2.16. Extent of hearing disability

For each of the household members with a hearing disability, the extent of disability was recorded as (i) cannot hear or can only hear loud sounds (ii) can hear only shouted words (iii) have hearing difficulty other than those covered in (i) and (ii) above.

If the person with a hearing disability cannot hear at all or can only hear loud sounds, such as thunder, for them extent of hearing disability was 'cannot hear or can only hear loud sounds'.

If a person with a hearing disability can hear only shouted words or could hear only if the speaker was sitting in the front, for such a person extent of a hearing disability 'can hear only shouted words'.

If the person has a hearing disability other than those mentioned in (i) and (ii) such persons were classified in category (iii). They usually ask to repeat the words spoken by the speaker would like to see the face of the speaker while he/she spoke or would feel difficulty in conducting conversations due to hearing disability.

2.17. Availability of facilities and difficulties faced by persons with disability.

The information on living arrangements, caregivers, the difficulty faced in accessing public transport, the difficulty faced in accessing public buildings, whether having disability certificate, out-of-pocket expenditure relating to disability etc. were recorded in respect of each person with at least one disability.

2.17.1. Living arrangement

The living arrangement meant arrangements that existed for the household member regarding where and with whom they lived. This was decided considering the following:

- i. composition of the household in which the person with a disability is a member

- ii. age of the household member.
- iii. marital status of the household member.

2.17.2. Arrangement of regular caregiver

For the purpose of the survey, a 'caregiver' meant any person who with or without payment provided care, support or assistance to a person with a disability. They included the household members also.

2.17.3. Receipt of any aid/help

The receipt of aid/help by the persons with disabilities was ascertained and information was recorded for each of the persons with disabilities. These were: received aid/help: **from the Government** for: education/training, aid/appliance, corrective surgery, treatment other than surgery, employment disability pension, in the form of loan, other social security, other government aid/help, **any aid/help from organisation other than Government, did not receive any aid/help.**

2.17.4. Use of public transport and difficulty faced in accessing/using public transport.

For a person with a disability, it was ascertained whether he/she used public transport during a period of the last 365 days preceding the date of the survey. For those who used public transport, difficulty faced in accessing/ using public transport was recorded. Public transport is a shared passenger-transport service that is available for use by the general public, as distinct from modes such as taxicab, carpooling or hired buses. Public transport includes buses, trams, trains, metro trains and ferries.

2.17.5. Accessing public buildings and difficulty faced in accessing public buildings

A building that is used by the public for purposes such as assembly, education, entertainment, workplace, office, worship, etc., was considered as public building. For a person with a disability, it was ascertained whether he/she accessed a public building during a period of the last 365 days preceding the date of the survey. For those who used accesses public building, the difficulty faced in accessing public buildings was recorded.

2.17.6. Certificate of Disability

For each of the household members with a disability, it was enquired whether he/she has a certificate of disability. Only the certificate of disability issued by any Government authorities (e.g., central/state/local bodies) was considered. For those with a certificate of disability information was recorded regarding the percentage of disability as per the certificate. The percentage of disability as per certificate was recorded as 40% or more but less than 60%, 60% or more but less than 80%, 80% or more, or none of these.

2.17.7. Out-of-pocket expenses relating to disability

In this survey, only out-of-pocket expenditure relating to disability incurred by the household was recorded. Out-of-pocket expenditures were those that were made directly by households excluding reimbursements. If the expenditure incurred by the household was later reimbursed, it was not recorded. If of the total out-of-pocket expenditure only a part was reimbursed, only that part of the out-of-pocket expenditure which was not reimbursed was considered. Out-of-pocket expenses relating to disability were collected separately for each of the following categories:

- i. Infrequent medical expenditure during last 365 days (e.g., surgery, equipment, hospitalisation, etc.) say (A): This expenditure covered medical expenditure during the last 365 days relating to disability which were of infrequent nature, i.e., if those were not usually incurred with monthly regularity.
- ii. Infrequent non-medical expenditure during last 365 days (e.g., transport, lodging, food, etc.) say (B): This expenditure covered non-medical expenditure during the last 365 days relating to disability which were of infrequent nature i.e. if those were not usually incurred with monthly regularity.
- iii. Usual monthly medical expenditure (e.g., medicine, caregiver, etc.) say (C): This expenditure covered those medical expenditures that were usually incurred with monthly regularity.
- iv. Usual monthly non-medical expenditure (e.g., transport, lodging, food, etc.) say (D): This expenditure covered that non-medical expenditure that was usually incurred with monthly regularity.

Average monthly out of pocket expenses per person due to disability

$$= \frac{[(A + B) / 12 + (C + D)]}{\text{total number of persons with disability reporting out of pocket expenditure on disability}}$$

2.17.8. Coverage of medical and non-medical expenditures

- i. Coverage of medical expenditure: Medical expenditure included doctor's/surgeon's fees, medicines, diagnostic tests, bed charges, attendant charges, physiotherapy, speech therapy, purchase/replacement/ repair of equipment/appliances, caregiver, etc.
- ii. Coverage of non-medical expenditure: Non-medical expenditure included transport (for a person with a disability by ambulance or another vehicle, including those accompanying the person with a disability, if any), registration fee, food, lodging charges, and other incidental charges incurred for treatment.

2.18. Usual activity particulars of household members with at least one disability

The information on the industry occupation of the working members, type of the enterprises in which they are working and the availability of social security benefits for the person employed as regular wage salaried employee were recorded. The particulars of usual activity were collected with reference to a period of 365 days preceding to date of the survey. The relevant concepts like economic activity, activity status, usual principal activity, usual subsidiary economic activity etc. were explained below.

2.18.1. Economic activity

The entire spectrum of human activity falls into two categories: economic activity and non-economic activity. Any activity that results in the production of goods and services that add value to the national product is considered an economic activity. It includes all the market activities i.e. the activities for pay or profit which result in the production of goods and services for exchange and non- market activities i.e. involve the production of primary commodities for own consumption and own account production of fixed assets.

2.18.2. Activity status

It is the activity situation relating to participation in economic and/or non-economic activities in which a person is found engaged during a reference period. According to this, a person is in one or a combination of the following three broad activity statuses during a reference period:

- (i) Working or being engaged in economic activity (work).
- (ii) Being not engaged in economic activity (work) and either making tangible efforts to seek 'work' or being available for 'work' if the 'work' is available and

(iii) Being not engaged in any economic activity (work) and also not available for 'work'. Activity statuses, as mentioned in (i) & (ii) above, are associated with 'being in the labour force' and the last with 'not being in the labour force'. Within the labour force, activity status (i) above is associated with 'employment' and activity status (ii) with 'unemployment'. During a specified reference period by adopting the procedure to determine the broad activity statuses, each person is classified into one of the three broad activity statuses. Persons found with the broad activity statuses (i), (ii) and (iii), during the reference period, are employed (worker), unemployed and 'not in the labour force', respectively.

3. SAMPLE DESIGN AND ESTIMATION PROCEDURE

3.1 Coverage:

- (i) The National Sample Survey (NSS), set up by the Government of India in 1950 to collect socio-economic data employing scientific sampling methods, conducted its seventy-sixth round from 1st July 2018 to 31st December 2018.
- (ii) Subject Coverage: In the NSS 76th round **schedule 26.0** covered the subject: 'Persons with Disabilities'.
- (iii) Geographical coverage: The survey covered the whole state except the villages which were difficult to access.

3.2 Survey Period and Participation:

- (i) Period of survey and work programme: The survey commenced on 1st July 2018. The survey was conducted for a duration of six months. There was no sub-round restriction for the sample design in this round.
- (ii) Participation of State: The following is the matching pattern of the participation for State Assam.

Extent of matching

Assam (Rural) equal

Assam (Urban) equal

3.3 Sample design:

3.3.1 A stratified two-stage design was adopted for the 76th-round survey. The first stage units (FSU) were villages/UFS blocks/sub-units (SUs) as per the situation. The ultimate stage units (USU) were households in both rural and urban areas. During this round, a rural village was notionally divided into a number of sub-units (SU) of more or less equal population during the preparation of the frame. Census 2011 population of villages was projected by applying suitable growth rates and the number of SUs formed in a village was determined apriori. The above procedure of SU formation was implemented in the villages with a population of more than or equal to 1000 as per Census 2011. There was no SU formation in uninhabited villages and villages with a population less than 1000 as per Census 2011 and the entire village was considered as one FSU. SUs were formed in the urban sector also.

3.3.2 **Selection of first-stage units:** A total of 228 villages were surveyed in rural Assam and the number of urban blocks surveyed was 72 as first-stage units (FSUs) in NSS 76th round for the state samples at all Assam levels, selected by Probability Proportional to Size Without Replacement (PPSWOR) sampling method. The results presented in this report are solely based on the state sample.

3.3.3 **Selection of second-stage units:** All the households listed in the selected village/UFS Block/SU were stratified into seven second-stage strata (SSS). SSS 1 was formed considering the households having a person(s) with any of the 11 rare disabilities ((i) acid attack victims, (ii) autism spectrum disorder, (iii) cerebral palsy, (iv) dwarfism, (v) haemophilia, (vi) multiple sclerosis, (vii) muscular dystrophy, (viii) other chronic neurological conditions, (ix) Parkinson's disease, (x) sickle cell disease, (xi) thalassemia). SSS 2 was formed from the remaining households (i.e., excluding the

households in SSS 1) having at least one person with mental disability. SSS 3 was formed from the remaining households (i.e., excluding the households in SSS 1 and SSS 2) having at least one person with a speech disability. SSS 4 was formed from the remaining households (i.e., excluding the households in SSS 1, SSS 2 and SSS 3) having at least one person with visual disability. SSS 5 was formed from the remaining households (i.e., excluding the households in SSS 1, SSS 2, SSS 3 and SSS 4) having at least one person with a hearing disability. SSS 6 was formed from the remaining households (i.e., excluding the households in SSS 1, SSS 2, SSS 3, SSS 4 and SSS 5) having at least one person with locomotor disability. SSS 7 was formed considering those households without any disability. A total of 20 households were planned to be selected from each sample village/UFS Block/SU for canvassing the detailed Schedule. The sample households from each of the second-stage strata were selected by Simple Random Sampling without Replacements (SRSWOR).

The total number of households in which scheduled 26.0 was canvassed, was 9877 and 2200 in rural and urban areas of Assam respectively.

3.4 Formation of Second Stage Strata (SSS) and allocation of households in different SSS for Schedule 26.0 (Survey of persons with disability)

The composition of the second-stage strata and the numbers of households planned to be surveyed for schedule 26.0 from different SSS were as follows:

SSS No.	compositions	Disability Group	Allocation of households
1	Households having a person(s) with any of the 11 rare disabilities: (i) acid attack victims (ii) autism spectrum disorder (iii) cerebral palsy (iv) dwarfism (v) haemophilia, (vi) multiple sclerosis, (vii) muscular dystrophy (viii) other chronic neurological conditions (ix) Parkinson's disease (x) sickle cell disease, (xi) thalassemia	I	8
2	The remaining, households have at least one person with mental disability	II	10
3	From the remaining, households have at least one person with a speech disability		
4	From the remaining, households having at least one person with visual disability		
5	From the remaining, households having at least one person with a hearing disability		
6	From the remaining, households having at least one person with a locomotor disability	No Disability	2
7	Households without any disability		

3.5 Selection of households

From each, the sample households were selected by simple random sampling without replacement (SRSWOR).

3.6 Estimation procedure

Notations

s =subscript for s^{th} stratum

t =subscript for t^{th} sub-stratum

i =subscript for i^{th} FSU [SU/village (*panchayat* ward)/block]

j =subscript for j^{th} second stage stratum in an FSU

k =subscript for k^{th} sample household within an FSU

N = Total number of FSUs in any rural/urban sub-stratum

Z = total size of villages in a rural sub-stratum (where villages were selected as FSUs i.e. sub-stratum numbers 01-10)

z =size of sample FSU used for selection in sub-stratum numbers 01-10

n =number of sample FSUs surveyed including uninhabited and 'zero cases' but excluding casualty for a particular sub-stratum

H = total number of households listed in a second-stage stratum of an FSU

h =number of households surveyed in a second-stage stratum of an FSU

x, y = observed value of characteristics x, y underestimation

$\hat{X}, \hat{Y}$ = estimate of population total X, Y for the characteristics x, y in terms of the above symbols,

y_{stijk} =observed value of the characteristic y for the k^{th} household of the j^{th} second stage stratum of the i^{th} FSU for the t^{th} sub-stratum of the s^{th} stratum.

However, for understanding, a few symbols have been suppressed in the following paragraphs where they are obvious.

3.7 Estimation of aggregates for a stratum × sub-stratum (Sch.26.0)

Rural:

Case1: Sub-strata of special Stratum (i.e. stratum=99 and sub-stratum=01)

- i. For j- the second-stage

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{H_{ij}}{h_{ij}} \sum_{k=1}^{h_{ij}} y_{ijk} \right]$$

Case2: Sub-strata of Group 1 villages (Sub-stratum Number: 01, 02, ..., 10)

- i. For j- th second-stage stratum of a stratum × sub-stratum

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{H_{ij}}{h_{ij}} \sum_{k=1}^{h_{ij}} y_{ijk} \right]$$

Case3: Sub-strata of Group 2 villages (Sub-stratum Number: 11 onwards)

- i. For j- th second-stage stratum of a stratum × sub-stratum

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{H_{ij}}{h_{ij}} \sum_{k=1}^{h_{ij}} y_{ijk} \right]$$

For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

Urban:

For j-th second-stage stratum of a stratum× sub-stratum

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{H_{ij}}{h_{ij}} \sum_{k=1}^{h_{ij}} y_{ijk} \right]$$

ii. For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.8 Overall Estimate of Aggregate for a stratum

Overall estimates for a stratum ($\hat{Y}_S$) were obtained as

$$\hat{Y}_S = \sum_t \hat{Y}_{st}$$

3.9 Overall Estimate of Aggregates a state level

The overall estimate $\hat{Y}^A$ at the State/UT/all-India level is obtained by summing the stratum estimates $\hat{Y}_S$ over all strata belonging to the State/ UT/ all-India.

3.10 Estimates of Ratios

Let $\hat{Y}^A$ and $\hat{X}^A$ be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/UT/ all-India level.

Then the combined ratio estimate ($\hat{R}$) of the ratio $R = \frac{Y}{X}$ will be

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

3.11 Multipliers

The formulae for multipliers at stratum/substratum/second-stage stratum level for Sch. 26.0 are given below:

The formula for multipliers (Schedule 26.0)

Sector	Multiplier
Rural(sub-strata of special stratum i.e. stratum= 99)	$\frac{N_{st}}{n_{stj}} \times \frac{H_{stij}}{h_{stij}}$
Rural (sub-stratum number: 01, 02,.....,10)	$\frac{Z_{st}}{n_{stj}} \times \frac{1}{z_{sti}} \times \frac{H_{stij}}{h_{stij}}$
Rural (sub-stratum number: 11 onwards)	$\frac{N_{st}}{n_{stj}} \times \frac{H_{stij}}{h_{stij}}$
Urban	$\frac{N_{st}}{n_{stj}} \times \frac{H_{stij}}{h_{stij}}$
j=1,2,3,4,5,6,7	

Note :

- For estimating any characteristic for any domain not specifically considered in the sample design, an indicator variable is used.
- Multipliers are computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule

CHAPTER FOUR

SUMMARY OF FINDINGS

This report is based on the Survey of Persons with Disabilities conducted by the Directorate of Economics and Statistics (DES), Assam from July –December 2018. The key findings of the survey on the different indicators such as the types of disabilities, the educational status of disabled people, the causes of disabilities, the treatment of disabilities, the out-of-pocket costs, the employment and unemployment status of disabled people aged 15 years and above, etc., presented at the state level, have been compiled in this chapter.

The discussion begins with an observation regarding the indicators that are used to identify a household member's disability using various features of each of the broad seven types of disabilities: locomotor, visual, hearing, speech and language, mental retardation/intellectual disability, mental illness, and other disabilities. Age at onset of disability, the cause of disability, disability treatment, aids and appliances, and the level of education and vocational/technical training among individuals with disabilities are also highlighted in this part.

This chapter also presents the findings on the extent of personal assistance required in doing daily activities & extent of disability, public transportation and buildings, disability certificates, the loss or modification of employment due to disability, the out-of-pocket expenses associated with disability, and employment and unemployment indicators among individuals aged 15 years and older with disabilities in their usual status (ps+ss).

4.1 Demographic Profile

According to the Assam Disability Census Report 2011, estimated disabled population of Assam is estimated at approx. 4 lakh 80 thousand out of which approx. 2 lakh 57 thousand are male and approx. 2 lakh 22 thousand are female as shown below. It seems that for both rural and urban areas the number of disabled persons is highest in the specified age group of 10-19 years.

ASSAM DISABILITY CENSUS, 2011													
Age Group	Total	0-4	5-9	10-19	20-29	30-39	40-49	50-59	60-69	70-79	80-89	90+	Age not stated
Total	480,065	22,587	35,211	76,681	69,749	62,662	57,728	47,178	49,075	36,350	15,779	6,478	587
Male	257,385	12,002	19,190	42,041	37,982	34,941	32,989	26,075	24,257	17,318	7,330	2,963	297
Female	222,680	10,585	16,021	34,640	31,767	27,721	24,739	21,103	24,818	19,032	8,449	3,515	290

For the 76th round NSS survey of Persons with Disabilities in Assam, a representative sample of the state population was surveyed which can be viewed from Statement 1.

Statement-1:

Number of villages/Blocks, Households and persons surveyed for State Assam										
State	State: Assam					State Sample				
	Rural					Urban				
	Number of villages	Male	Female	Transgender	Persons	Number of UFS blocks	Male	Female	Transgender	Persons
Assam	228	5380	4493	4	9877	72	1207	992	1	2200

Note-Refer Table-1 in Annexure-26.0

For the NSS 76th round Survey of Persons with Disabilities, there were 228 villages and 72 UFS blocks surveyed for the state of Assam. From statement-1 we observe that the survey was based on 9877 persons in Rural and 2200 persons in urban areas. Also, the cases surveyed for males are more in comparison to female cases surveyed for both rural and urban areas.

Statement-2:

Estimated Number of Households, persons (000) average HH size (00) and sex ratio (no. of female per 1000 of male)																		
State	Rural						Urban						Rural + Urban					
	HH (00)	Persons			Avg. HH size(00)	Sex Ratio	HH(00)	Persons			Avg. HH size(00)	Sex Ratio	HH (00)	Persons			Avg. HH size(00)	Sex Ratio
		Male	Female	Persons				Male	Female	Persons				Male	Female	Persons		
Assam	58668	14783	12487	27270	4.648	845	10384	2384	1879	4263	4.1053	788	69052	17167	14366	31533	4.56	837

Note-Refer. Table-3 in Annexure-26.0

The distribution of households, persons, average household size, and sex ratio is shown below in statement 2. These estimates are obtained on the basis of the NSS 76th round Survey of Persons with Disabilities. It may be noted that the design of this survey was not aimed at estimating the population. However, estimates of the population provided in this report may be useful for combining the rates and ratios.

From Statement 2 we observe that, in Assam, the average size of household has been reported as 4.6 out of which 4.6 are in rural and 4.1 are in the urban areas. The sex ratio is reported as 837 in Assam (number of females per 1000 males) whereas it is reported as 845 in rural and 788 in urban.

4.2 Indicators relating to the prevalence of broad types of disabilities

This chapter provides an estimate of the number of individuals in the population who have only one broad type of disability. It is important to note that the category 'other type of disability' includes chronic neurological conditions such as multiple sclerosis, Parkinson's disease, and other chronic neurological disorders, as well as blood disorders like haemophilia, thalassemia, and sickle cell disease. For 'locomotor disability,' 'mental retardation/intellectual disability,' and 'other type of disability,' the Schedule of Enquiry was designed to collect information on up to three specific types of disability within each broad category for each individual.

Individuals with multiple disabilities are those who experience more than one type of disability (refer to Para. 2.5.8 of Chapter Two). If a person has multiple types of locomotor disabilities, or more than one type of mental retardation/ intellectual disability or more than one other type of disability, they are also classified under multiple disabilities. Consequently, the total estimates for different broad types of disabilities and multiple disabilities do not sum up to the total count of individuals with 'any disability.'

The estimated number of individuals with only locomotor disability refers to those who have locomotor disability exclusively, without any other form of disability. The same principle applies to the other broad categories of disabilities.

Statement-3:

Estimated(00) number of persons in each type of disability considering only one broad type of disability									
Broad type of disability	Rural			Urban			Rural + Urban		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Only locomotor disability	610	288	898	93	64	157	703	351	1054
Only Blindness	211	116	327	36	11	47	247	127	374
Only low vision	102	63	165	8	13	21	110	76	186
Only visual disability	312	179	491	44	23	67	356	202	558
Only hearing disability	234	152	386	35	19	54	269	171	440
Only speech and language disability	297	160	457	34	14	48	331	174	505
Only mental retardation/intellectual disability	94	42	136	9	14	23	103	56	159
Only mental illness	107	76	183	16	5	21	123	81	204
Only other types of disability	113	104	217	11	23	34	123	127	250

All person	147831	124874	272705	23836	18790	42626	171667	143663	315331

Note-Refer. Table6 in Annexure-26.0

From Statement-3 we observe that among the estimated number of persons in each broad type of disability considering only one broad type of disability in Assam, 1054 estimated number of persons corresponding to the cadre of only locomotors disability which show the highest figure. The second highest value i.e. 558 stands for the cadre of the estimated number of persons possessing only visual disability.

On the other hand, the estimated number of persons belonging to only mental retardation/intellectual disability shows the lowest figure of 159 and the second lowest figure i.e. 185 for the type of only low vision. Further estimated number of persons suffering from multiple disabilities is 89 which is very low.

Statement-4:

Estimated number of persons in each broad type of disability									
Broad type of disability	Rural			Urban			Rural + Urban		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
Locomotor disability	635	308	943	95	64	159	729	372	1101
Blindness	212	122	334	36	11	47	248	133	381
Low vision	103	66	169	8	14	22	111	80	191
Visual disability	315	188	503	44	24	68	359	213	572
Hearing disability	256	172	428	36	21	57	292	193	485
Speech and language disability	325	183	508	35	15	50	361	198	559
Mental retardation/ intellectual disability	103	49	152	9	14	23	112	63	175
Mental illness	109	78	187	17	5	22	126	83	209
Other types of disability	123	105	228	13	23	36	137	128	265
Any disability	1811	1038	2849	245	164	409	2056	1203	3259
No disability	146020	123835	269855	23591	18625	42216	169611	142461	312071
All person	147831	124874	272705	23836	18790	42626	171667	143663	315331

Note-Refer. Table8 in Annexure-26.0

Instatement 4, the estimated number of persons with broad types of disability in Assam has been presented.

For any broad type of disability, say, locomotor disability, the estimated number of persons with locomotor disability has been considered irrespective of whether he/she has other broad types of disabilities or not. Similarly for the remaining broad type of disabilities (See Para. 2.5 of Chapter Two).

From our observation, we find that the highest value i.e. 1101 corresponds to the estimated number of persons with locomotor disability followed by 572 persons with visual disability, 559 persons with speech & language disability and so on. Again, the estimated number of persons suffering from mental retardation /intellectual disability i.e. 175 is at least one.

Similarly, the estimated number of persons who come under the low vision group also shows a lower value of 191.

4.3 Status of education and technical training among persons with disabilities

In this portion, literacy rate and technical education are depicted among persons with disabilities.

Statement -5:

Percentage distribution of persons with different broad types of disability of age 3-35 years by enrolment			
Indicators	Male	Female	Person
	RURAL		
Percentage of person with disability who attended pre-school intervention programme	33.6	37.5	35.1
Percentage of person with disability who ever enrolled in ordinary school	53.7	53.8	53.7
Percentage of person who currently attending in ordinary school	31.2	26.2	29.3
Percentage of person who currently not attending in ordinary school due to onset of disability	9.9	11.4	10.5
Percentage of person with disability who ever enrolled in special school	1.8	2.0	1.9
Percentage of person who currently attending in special school	0.6	1.0	0.7
	URBAN		
Percentage of person with disability who attended pre-school intervention programme	26.6	22.8	25.0
Percentage of person with disability who ever enrolled in ordinary school	51.0	52.9	51.8
Percentage of person who currently attending in ordinary school	24.9	22.2	23.8
Percentage of person who currently not attending in ordinary school due to onset of disability	3.9	8.9	6.0
Percentage of person with disability who ever enrolled in special school	1.1	0.5	0.8
Percentage of person who currently attending in special school	1.1	0.0	0.6
	ALL		
Percentage of person with disability who attended pre-school intervention programme	32.7	35.5	33.8
Percentage of person with disability who ever enrolled in ordinary school	53.4	53.6	53.5
Percentage of person who currently attending in ordinary school	30.5	25.7	28.6
Percentage of person who currently not attending in ordinary school due to onset of disability	9.2	11.1	9.9
Percentage of person with disability who ever enrolled in special school	1.7	1.8	1.8
Percentage of person who currently attending in special school	0.7	0.8	0.7

Note- Refer. Table-43 in Annexure 26.0

From Statement -5 we have observed in the state of Assam the percentage distribution of persons with disability who ever enrolled in ordinary school show the highest figure of 53.5%. However, the percentage of people who currently attend special schools is 0.7% which is very low.

Again, it is observed that in rural areas, the percentage of persons with disability who enrolled in ordinary schools is higher than that of urban areas.

Statement-6:

Percentage distribution of Persons with disability of age 3-35 years by level of current educational attendance				
Indicators		Male	Female	Person
		Rural		
Currently attending in the grade	Below Primary	18.4	10.0	15.5
	Primary	30.6	28.7	30.0
	Upper Primary	14.5	32.0	20.5
	Secondary	26.5	19.7	24.2
	Higher Secondary	8.8	6.3	7.9
	Graduate and above	1.2	3.3	1.9
	Total	100.0	100.0	100.0
		Urban		
Currently attending in the grade	Below Primary	16.7	11.0	14.4
	Primary	37.8	18.9	30.4
	Upper Primary	10.4	32.4	19.1
	Secondary	8.9	17.9	12.4
	Higher Secondary	21.3	9.3	16.6
	Graduate and above	4.9	10.5	7.1
	Total	100.0	100.0	100.0
		All		
Currently attending in the grade	Below Primary	18.2	10.1	15.4
	Primary	31.3	27.6	30.0
	Upper Primary	14.1	32.0	20.3
	Secondary	24.8	19.5	23.0
	Higher Secondary	10.0	6.7	8.8
	Graduate and above	1.6	4.1	2.5
	Total	100.0	100.0	100.0

Note- Refer. Table-44 in Annexure 26.0

Statement 6 indicates that among the disabled persons belonging to the age group 3-35 years percentage of persons currently attending primary school i.e. 30.0% is the highest among all the grades. On the other hand, the percentage of persons having educational status as currently graduate and above, i.e. 2.5% which is the least out of all grades.

Statement- 7:

Status of school education and technical training				
Indicator		Male	Female	Person
		Rural		
Literacy rate (in per cent) among persons with disability of age 7 years and above		71.4	68.3	70.2
Percentage of persons of age 15 years and above with disability	Having the highest level of completed education secondary and above	20.9	11.6	17.4
	With technical education	0.0	0.0	0.0
Percentage of persons of age 15-59 years with a disability who received vocational/technical training	Formal vocational/technical training	0.9	0.2	0.7
	Other than formal vocational/technical training	1.2	0.3	0.9
		Urban		
Literacy rate (in per cent) among persons with disability of age 7 years and above		77.6	74.8	76.4
Percentage of persons of age 15 years and above with disability	Having the highest level of completed education secondary and above	42.4	24.7	35.1
	With technical education	100	100	100
Percentage of persons of age 15-59 years with a disability who received vocational/technical training	Formal vocational/technical training	1.1	1.9	1.5
	Other than formal vocational/technical training	0.0	0.9	0.4
		All		
Literacy rate (in per cent) among persons with disability of age 7 years and above		72.1	69.2	71
Percentage of persons of age 15 years and above with disability	Having the highest level of completed education secondary and above	23.4	13.4	19.6
	With technical education	0.0	0.0	0.0
Percentage of persons of age 15-59 years with disability who received vocational/technical training	Formal vocational/technical training	0.9	0.5	0.8
	Other than formal vocational/technical training	1.0	0.4	0.8

Note-Refer. Table 20.1S, 20.2S 20.3S 20.4S, 50.1, 50.2S and 50.3S in Annexure 26.0

From Statement- 7 we observe that the literacy rate (in per cent) among persons with disability of age 7 years and above in Assam is 71% out of which the literacy rate of males is 72.1% whereas females is 69.2%.

Further, the specific literacy rate in Assam among disabled persons of specified age group 7 years and more is 70.2% for rural and 76.4% for urban areas respectively.

The statement-7 also reveals that 19.6% disabled persons of aged 15 years and above have the highest level of completed education secondary and above. Again, 0.8% of persons aged 15-59 years with disability have received formal vocational/technical training. The percentage of persons who receive other than formal vocational/ technical training is also the same.

4.4Age at the onset of disability and incidence of disability

Statement-8:

Percentage distribution of persons who were not having disability since birth but by different age at onset of disability				
Indicators		Male	Female	Person
		Rural		
Percentage distribution of persons with disability who were not having disability since birth by age at onset of disability	0 to 4 years	8.3	4.1	6.7
	5 to 14 years	19.2	25.3	21.6
	15 to 59 years	59.7	61.0	60.2
	60 years and above	12.8	9.6	11.5
	All ages	100.0	100.0	100.0
		Urban		
Percentage distribution of persons with disability who were not having disability since birth by age at onset of disability	0 to 4 years	5.2	9.3	6.7
	5 to 14 years	14.6	18.3	16.0
	15 to 59 years	53.7	52.9	53.4
	60 years and above	26.5	19.5	23.9
	All ages	100.0	100.0	100.0
		All		
Percentage distribution of persons with disability who were not having disability since birth by age at onset of disability	0 to 4 years	7.9	4.8	6.7
	5 to 14 years	18.6	24.4	20.9
	15 to 59 years	58.9	60.0	59.3
	60 years and above	14.6	10.8	13.1
	All ages	100.0	100.0	100.0

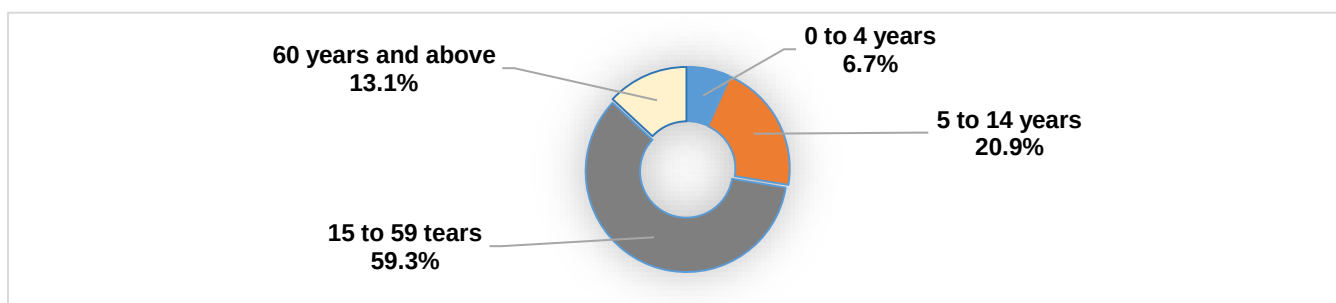

Note-Refer. Table no 22.1S, 22.2S AND 22.3Sin Annexure 26.0

Note: 1. The indicators in this Statement are presented for persons with disabilities who were not having disability since birth.

2. If a person has more than one type of disability, 'age at onset of disability' was taken as the lowest among all such ages. Hence, for each person with a disability, the age at onset of the disability is classified as either '0 to 4 years' or '5 to 14 years' or '15 to 59 years' or '60 years and above'.

Statement 8 represents the percentage distribution of persons who do not have disability since birth but have it later at the different age groups. We have observed that 59.3% of persons who have onset of disability in the age group 15 to 59 years show the highest value followed by 20.9% in the age group 5 to 14 years, 13.1% in the age group 60 years and above, and 6.7% in the age group 0 to 4 years. i.e. Out of all age groups, in the specific age group of 15-59 years highest percentage of people who were not disabled since birth were found to become disabled. On the contrary the least percentage of persons who were not disabled since birth were found to become disabled in the age group of 0-4 years after birth.

Figure 1: Percentage distribution of persons with disability who were disability since birth by age at onset of Disability

4.5 Cause of Disability

In the NSS 76th round survey, information on the causes of disability was collected for 'locomotor disability,' 'visual disability,' 'hearing disability,' and 'speech and language disability.' The causes for these disabilities were categorized as 'due to disease,' 'due to burn,' 'due to injury other than burn,' or 'other reasons.'

Statement-9:

Cause of locomotor disability

Indicator		Male	Female	Person
		Rural		
Percentage of persons with locomotor disability by cause of locomotor disability	Disease	51.7	51.3	51.6
	Burn	2.7	2.6	2.7
	Injury other than burn	10.3	7.4	9.3
	Other reasons	35.3	38.7	36.4
	All causes	100.0	100.0	100.0
		Urban		
Percentage of persons with locomotor disability by cause of locomotor disability	Disease	40.5	46.1	42.7
	Burn	2	1.4	1.8
	Injury other than burn	30.8	8.8	21.9
	Other reasons	26.7	43.7	33.6
	All causes	100.0	100.0	100.0
		All		
Percentage of persons with locomotor disability by cause of locomotor disability	Disease	50.3	50.3	50.3
	Burn	2.7	2.4	2.6
	Injury other than burn	12.9	7.7	11.1
	Other reasons	34.1	39.6	36
	All causes	100.0	100.0	100.0

Note-Refer Table No 23.1S, 23.2S, & 23.3S in Annexure 26.0

Note: 1. If a person had more than one locomotor disability and the cause of each of these locomotor disabilities were different then the person was considered for each of such causes separately. For each person with a locomotor disability, the cause of the locomotor disability is recorded separately for each of the type of locomotor disability. For each type of locomotor disability, information on one cause of locomotor disability was collected.

2.If a person had more than one locomotor disability and the causes for these locomotor disabilities were the same then the person was considered only once against that cause.

3. If a person had only one locomotor disability, the person was considered against the cause of locomotor disability reported by the person.

As per Statement-9, in the state of Assam highest percentage of persons i.e. 50.3% with locomotor disability acquired it due to disease, followed by 36% due to other reasons, 11.2% due to injury other than burn, and 2.6% due to burn.

Statement-10:

Cause of visual disability

Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons with visual disability by cause of visual disability	Disease	40.2	41.8	40.8
	Burn	1.5	0.7	1.2
	Injury other than burn	4.5	7.3	5.6
	Other reasons	53.7	50.2	52.4
	All causes	100.0	100.0	100.0
		Urban		
Percentage distribution of persons with visual disability by cause of visual disability	Disease	53.2	57.0	54.6
	Burn	0.0	0.0	0.0
	Injury other than burn	16.6	17.2	16.8
	Other reasons	30.1	25.8	28.6
	All causes	100.0	100.0	100.0
		All		
Percentage distribution of persons with visual disability by cause of visual disability	Disease	41.8	43.5	42.5
	Burn	1.3	0.6	1.1
	Injury other than burn	6.0	8.4	6.9
	Other reasons	50.8	47.4	49.6
	All causes	100.0	100.0	100.0

Note-Refer Table 24.7S, 24.8S, & 24.9S in Annexure 26.0

Note: 1. For each person with visual disability, the cause for the visual disability was classified as either (i) disease or (ii) burn or (iii) injury other than burn or (iii) other reasons. Thus, each person with visual disability was classified in any one of these causes of disability.

According to Statement -10, 49.6% of persons are having visual disability due to other reasons, followed by 42.5% due to disease, 6.9% due to injury other than burn and 1.1% due to burn.

Statement -11

Cause of Hearing Disability

Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons with hearing disability by cause of hearing disability	Disease	58.4	65.1	61.1
	Burn	2.2	3.6	2.8
	Injury other than burn	6.5	2.1	4.7
	Other reasons	33	29.1	31.4
	All causes	100.0	100.0	100.0
		Urban		
Percentage distribution of persons with hearing disability by cause of hearing disability	Disease	69.6	54.2	63.9
	Burn	0.0	0.0	0.0
	Injury other than burn	4.9	0.0	3.1
	Other reasons	25.5	45.8	33.0
	All causes	100.0	100.0	100.0
		All		
Percentage distribution of persons with hearing disability by cause of hearing disability	Disease	59.7	64.0	61.4
	Burn	1.9	3.3	2.4
	Injury other than burn	6.3	1.9	4.5
	Other reasons	32.1	30.9	31.6
	All causes	100.0	100.0	100.0

N

Note- Refer Table 25.1S, 25.2S & 25.3S as in Annexure 26.0

Note: 1.For each person with hearing disability, the cause for the hearing disability was classified as either (i) disease or (ii) burn or (iii) injury other than burn or (iii) other reasons. Thus, each person with hearing disability was classified in any one of these causes of disability.

According to Statement- 11, 61.4% persons having hearing disability is due to disease, 31.6% due to other reasons, 4.5% due to injury other than burn and 2.4% of persons are having hearing disability due to burn.

Statement -12

Cause of Speech and Language disability

Indicator		Male	Female	Persons
		Rural		
Percentage distribution of persons with speech and language disability by cause of speech and language disability	Disease	37.9	33.5	36.3
	Burn	0.0	0.0	0.0
	Injury other than burn	3.4	2.4	3.0
	Other reasons	58.7	64.1	60.6
	All causes	100.0	100.0	100.0
		Urban		
Percentage distribution of persons with speech and language disability by cause of speech and language disability	Disease	62.8	36.1	54.9
	Burn	0.0	0.0	0.0
	Injury other than burn	1.8	4.5	2.6
	Other reasons	35.5	59.4	42.5
	All causes	100.0	100.0	100.0
		All		
Percentage distribution of persons with speech and language disability by cause of speech and language disability	Disease	40.4	33.7	38.0
	Burn	0.0	0.0	0.0
	Injury other than burn	3.2	2.5	3.0
	Other reasons	56.4	63.8	59.0
	All causes	100.0	100.0	100.0

Note-Refer Table 26.1S, 26.2S, & 26.3S as in Annexure 26.0

Note: 1. For each person with a speech and language disability, the cause for the speech and language disability was classified as either (i) disease (ii) burn or (iii) injury other than burn or (iii) other reasons. Thus, each person with speech and language disability was classified in any one of these causes of disability.

As per Statement- 12, 59.0% of persons have speech and language disability due to other reasons, 38.0% due to disease, and 3.0% due to injury other than burn.

4.6 Treatment for disability and aid/appliances

For each individual with a disability, information was gathered on whether they had received treatment, were undergoing treatment, had not taken treatment, or if their treatment status was unknown. In this report, these categories are collectively referred to as the 'status of treatment taken. Additionally, for individuals with locomotor, visual, and hearing disabilities, data was collected on the acquisition of aids and appliances. This included whether aids/appliances were obtained, the method of acquisition (purchase or assistance), the type of aid/appliance acquired, and whether they were used regularly.

Statement -13:

Percentage of persons by status of treatment taken for disability				
Indicator		Male	Female	Person
		Rural		
Percentage of persons with disability	Who took treatment by consulting a doctor	65.5	65.2	65.4
	Who took treatment other than by consulting a doctor	6.9	9.9	8
	Who were undergoing treatment by consulting a doctor	9.4	9.2	9.3
	Who were undergoing treatment other than by consulting a doctor	0.9	0.8	0.9
	Who were attending special school/special therapy	0.1	0	0.1
	Who did not take treatment since they could not afford treatment	2.2	2.3	2.2
	Who did not take treatment since treatment was not available	2.9	3.3	3
	Who did not take treatment since treatment was not required	7.4	6.6	7.1
	For whom it was not known whether treatment taken/undergoing treatment	5	3.8	4.6
		Urban		
Percentage of persons with disability	Who took treatment by consulting a doctor	63.7	71.3	66.7
	Who took treatment other than by consulting a doctor	2.1	3	2.5
	Who were undergoing treatment by consulting a doctor	13.9	12.7	13.4
	Who were undergoing treatment other than by consulting a doctor	3.4	0	2
	Who were attending special school/special therapy	1.9	1.4	1.7
	Who did not take treatment since they could not afford treatment	2.7	2	2.4
	Who did not take treatment since treatment was not available	1.6	0	0.9
	Who did not take treatment since treatment was not required	7.9	6	7.1
	For whom it was not known whether treatment taken/undergoing treatment	3.4	4.3	3.8
		All		
Percentage of persons with disability	Who took treatment by consulting a doctor	65.2	66.1	65.5
	Who took treatment other than by consulting a doctor	6.3	8.9	7.3
	Who were undergoing treatment by consulting a doctor	9.9	9.7	9.8
	Who were undergoing treatment other than by consulting a doctor	1.2	0.7	1
	Who were attending special school/special therapy	0.3	0.2	0.3
	Who did not take treatment since they could not afford treatment	2.3	2.2	2.3
	Who did not take treatment since treatment was not available	2.7	2.8	2.8
	Who did not take treatment since treatment was not required	7.5	6.5	7.1
	For whom it was not known whether treatment taken/undergoing treatment	4.8	3.9	4.5

Note: Refer Table-29.1S,29.2 S,29.3S as in Annexure 26.0

- Note: 1. If a person had more than one type of disability and 'the status of treatment taken' for different types of disabilities were different, the person was considered against each of such 'status of treatment taken' separately. For each type of locomotor disability, information on 'status of treatment taken' was collected separately and for each such disability, information on one 'status of treatment taken' was collected.
2. If a person had more than one type of disability but the 'status of treatment taken' for each of such disability was the same, the person was considered only once against that 'status of treatment taken'.

3. If a person had only one type of disability, the person was considered against that 'status of treatment taken' reported by the person.

From Statement -13, we observe that 65.5% of persons with disability took treatment by consulting a doctor, followed by 9.8% of persons who were undergoing treatment by consulting a doctor. On the other hand, 2.8% person did not take treatment since treatment was not available and only 2.3% of disabled persons did not take treatment since they could not afford it.

Statement-14:

Percentage of persons with locomotor disability who were advised aid/appliances and who were not advised aid/appliances				
Indicator		Male	Female	Person
		Rural		
Percentage of persons with locomotor disability	Who were advised aid/appliances and acquired aid/appliance	8.3	12.8	9.8
	Who were advised aid/appliances but did not acquire aid/appliances since could not afford	13.8	16.6	14.8
	Who were advised aid/appliances but did not acquire aid/appliances since not available	7.4	9.0	7.9
	Who were advised aid/appliances but did not acquire aid/appliance due to other reasons	5.8	6.9	6.1
	Who were not advised aid/appliances	64.7	54.7	61.4
	All	100.0	100.0	100.0
		Urban		
Percentage of persons with locomotor disability	Who were advised aid/appliances and acquired aid/appliance	29.0	15.0	23.3
	Who were advised aid/appliances but did not acquire aid/appliances since could not afford	9.5	15.2	11.8
	Who were advised aid/appliances but did not acquire aid/appliances since not available	3.6	1.7	2.9
	Who were advised aid/appliances but did not acquire aid/appliance due to other reasons	3.4	5.8	4.3
	Who were not advised aid/appliances	54.5	62.3	57.7
	All	100.0	100.0	100.0
		All		
Percentage of persons with locomotor disability	Who were advised aid/appliances and acquired aid/appliance	11.0	13.2	11.7
	Who were advised aid/appliances but did not acquire aid/appliances since could not afford	13.3	16.4	14.4
	Who were advised aid/appliances but did not acquire aid/appliances since not available	6.9	7.8	7.2
	Who were advised aid/appliances but did not acquire aid/appliance due to other reasons	5.5	6.7	5.9
	Who were not advised aid/appliances	63.3	55.9	60.8
	All	100.0	100.0	100.0

Note: Refer Table 30.1, 30.2, 30.3 as in Annexure 26.0

- Note: 1. For each of the locomotor disability, information on whether aid/appliances were advised was collected in terms of either 'acquired' or 'not acquired: cannot afford' or 'not acquired: not available' or 'not acquired: others' or 'not advised'.*
- 2. If a person had more than one type of locomotor disability and the status of advice of aid/appliances for different categories of locomotor disability were different then the person was counted once against each of such status of advice of aid/appliances. However, if a person has more than one category of locomotor disability but the status of advice of aid/appliances for each of such categories of locomotor disability was the same then the person was counted only once against that status of advice of aid/appliances.*

From Statement -14, we have observed that 60.8% of persons with locomotor disability were not advised aid/appliances whereas a minimum of 5.9% of persons with locomotor disability were advised aid/appliances but did not acquire it due to other reasons.

Statement- 15:

Percentage of persons with locomotor disability who acquired aid/appliances by the method of acquiring aid/appliances				
Indicator		Male	Female	Person
		Rural		
Among the persons with locomotor disability who acquired aid/appliance, the percentage of persons who acquired through	Purchase	25.3	14.7	20.8

Percentage of persons with locomotor disability who acquired aid/appliance and using it regularly		69.3	82.5	74.3

Note-Refer Table 30.1, 30.2, 30.3, 31.1 & 31.2 as in Annexure 26.0

- Note: 1. Methods of acquiring aid/appliances were either through (i) purchase or (ii) assistance from the government or (iii) assistance from a non-government organisation or (iv) assistance from others.
2. If a person had more than one type of locomotor disability and the 'method of acquiring aid/appliances' for different types of locomotor disabilities were different then the person was considered against each of such 'methods of

acquiring aid/appliances' separately. For each type of locomotor disability, information on the 'method of acquiring aid/appliances was collected separately and for each type of locomotor disability, information on one 'method of acquiring aid/appliances' was recorded.

3. If a person had more than one category of locomotor disability but the 'method of acquiring aid/appliances' for each of such categories of locomotor disability was the same, the person was considered only once against that 'method of acquiring aid/appliances'.

4. If a person had only one type of locomotor disability, the person was considered against that 'method of acquiring aid/appliances' reported by the person.

Statement 15 indicates that in rural areas, among the persons with locomotor disability who acquired aid/appliance, the highest percentage of persons i.e. 48.2% acquired it through assistance from -government organisations. Whereas in urban areas the highest percentage of persons i.e. 62.3% acquired it through purchase.

In the state of Assam almost 40% of persons with a locomotor disability acquired aid/appliance from government organisations and from Non-Government Organizations it is very low i.e. only 6.8%

Statement -16:

Percentage of persons with locomotor disability who acquired aid/appliances for different types of aid/appliances and percentage of persons with locomotor disability who acquired aid/appliances

	All	100.0	100.0	100.0

Note-Refer Table 31.1, 31.2 as in Annexure 26.0

Note: 1. Percentages of persons with different types of aid/appliances have been calculated considering those persons with

locomotor disability who acquired aid/appliance.

2. If a person had more than one type of locomotor disability and the 'type of aid/appliances' for different types of locomotors

disability were different then the person was considered against each of such 'type of aid/appliances' separately. For each type of locomotor disability, information on the type of aid/appliance was collected separately and for each type of locomotor disability, information on one 'type of aid/appliance' was recorded. For each type of locomotor disability, information on one type of aid/appliance was recorded.

3. If a person had more than one type of locomotor disability but 'type of aid/appliances' for each of such types of locomotor disabilities were the same, the person was considered only once against that 'type of aid/appliance'.

4. A person with only one type of locomotor disability, who acquired aid/appliances, was considered against that aid/appliance which he/she acquires.

As per Statement-16, out of the persons with locomotor disability, 31.2% of persons acquired other types of aid/appliances while 24.1% of persons acquired manual wheelchairs. Additionally, only a small percentage i.e. 1.8% of persons acquired splint

Statement -17:

Percentage distribution of persons with visual disability by status of aid/appliances advised				
Indicator		Male	Female	Person

	All methods	100.0	100.0	100.0
Percentage of persons with visual disability who acquired aid/appliance and using it regularly		90.7	96.9	93.5

Note-Refer Table 32.5, 32.6 as in Annexure 26.0

Note: 1. Methods of acquiring aid/appliances were either through (i) purchase or (ii) assistance from the government (iii) assistance from non-government organisations or (iv) assistance from others. For each person with a visual disability, information on one 'method of acquiring aid/appliances' was collected. Thus, each person with a visual disability was classified in any one of these ' methods of acquiring aid/appliances.

According to Statement -18, the percentage of persons with a visual disability who acquired aid/appliance also using it regularly is 93.5%. Again, among the persons with visual disability who acquired aid/ appliances through purchase is 79.5% which is the highest of all the method

Statement -19:

Percentage distribution of persons with visual disability who acquired aid/appliances by type of aid/appliances				
Indicator		Assam		
		Male	Female	Person
Percentage distribution of persons with visual disability who acquired aid/appliances by type of aid/appliance	High Powered Glasses	47.4	84.2	50.4
	Contact Lens	6.8	6.8	0.0
	Smart Cane	0.0	1.1	0.0
	Regular Cane	13.4	5.4	35.3
	Other cane	4.0	0.0	0.0
	Other aid/appliances	28.4	2.5	14.4
	All	100.0	100.0	100.0

Note- Refer Table 32.5, 32.6 as in Annexure 26.0

Note:1. Percentages of persons with different types of aid/appliances have been calculated considering those persons with a visual disability who acquired aid/appliance. For each person with a visual disability, who acquired aid/appliances, consider the appliance that he/she acquired. For each person with visual disability, who acquired aid/appliances, information on only one type of aid/appliance was collected.

As observed in Statement 19, 50.4% of persons with a visual disability acquired high-powered glasses whereas 14.4% of persons acquired other aids/ appliances.

Statement -20:

Percentage distribution of persons with hearing disability by status of aid/appliances advised				
Indicator		Male	Female	Person
		Rural

Percentage of persons with hearing disability who acquired aid/appliance and using it regularly		88.1	100.0	90.8
		All		
Among the persons with hearing disability who acquired aid/appliance, the percentage distribution of persons by the method of acquiring aid/appliances	Purchase	89.6	87.0	88.6
	Assistance from Government	4.1	2.6	3.5
	Assistance from non-Government organizations	3.5	4.2	3.7
	Assistance from others (NGOs, charitable organizations, trusts or other philanthropic organizations)	2.9	6.2	4.1
	All methods	100.0	100.0	100.0
Percentage of persons with a hearing disability who acquired aid/appliance and using it regularly		88.0	87.8	87.9

Note- Refer Table 30.1, 30.2, 30.3 as in Annexure 26.0

Note: 1. The Method of acquiring aid/appliances was either through (i) purchase or (ii) assistance from the government or (iii) assistance from a non-government organisation or (iv) assistance from others. For each person with a hearing disability, information on one 'method of acquiring aid/appliances' was collected. Thus, each person with a hearing disability was classified in any one of these ' methods of acquiring aid/appliances.

Based on Statement 21 among the persons with hearing disability who acquired aids/appliances, the percentage of persons who have acquired aids/appliances by method of purchase is 88.3%. Which is the highest one among all the methods.

Again, the percentage of persons with a hearing disability who acquired aid/appliances through Assistance from the Government i.e. 3.5% is lower than that of other methods

Statement- 22:

Percentage distribution of persons with hearing disability who acquired aid/appliances by type of aid/appliances				
Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons with hearing disability who acquired aid/appliances by type of aid/appliance	Hearing aid	85.8	92.3	88.5
	Other aid/appliances	14.2	7.7	11.5
	All	100.0	100.0	100.0

	All	100.0	100.0	100.0
		All		
Percentage distribution of persons with hearing disability who acquired aid/appliances by type of aid/appliance	Hearing aid	88.0	92.8	89.9
	Other aid/appliances	12.0	7.2	10.1
	All	100.0	100.0	100.0

Note- Refer Table 33 as in Annexure 26.0

Note: Percentages of persons with different types of aids/appliances have been calculated considering those persons with hearing disability who acquired aids/appliances. Each person with a hearing disability who acquired aid/appliances was considered against that aid/appliance which he/she acquired. For each person with a hearing disability, who acquired aid/appliances, information on only one type of aid/appliance was collected.

The Statement-22 presents that percentage of persons with hearing disability who acquired hearing aids is 89.9%, which is the highest among all the types of aid /appliances. Whereas the percentage of persons acquiring other aid/appliances i.e. 10.1% is obtained as to be least.

Figure 2: Percentage of persons with locomotor disability, visual disability, and hearing disability who acquired aid/appliances

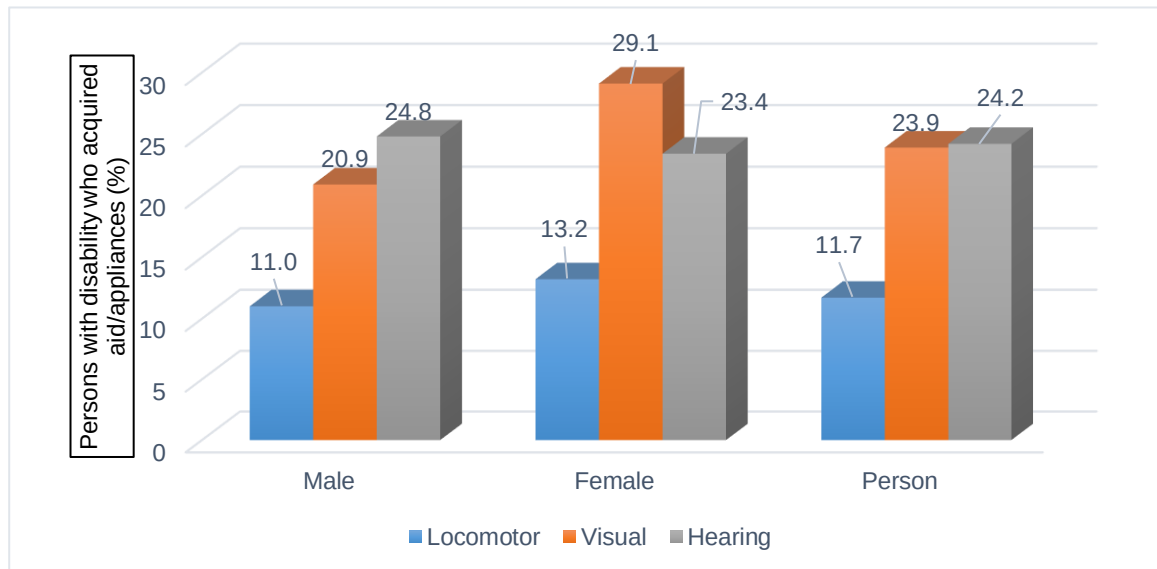

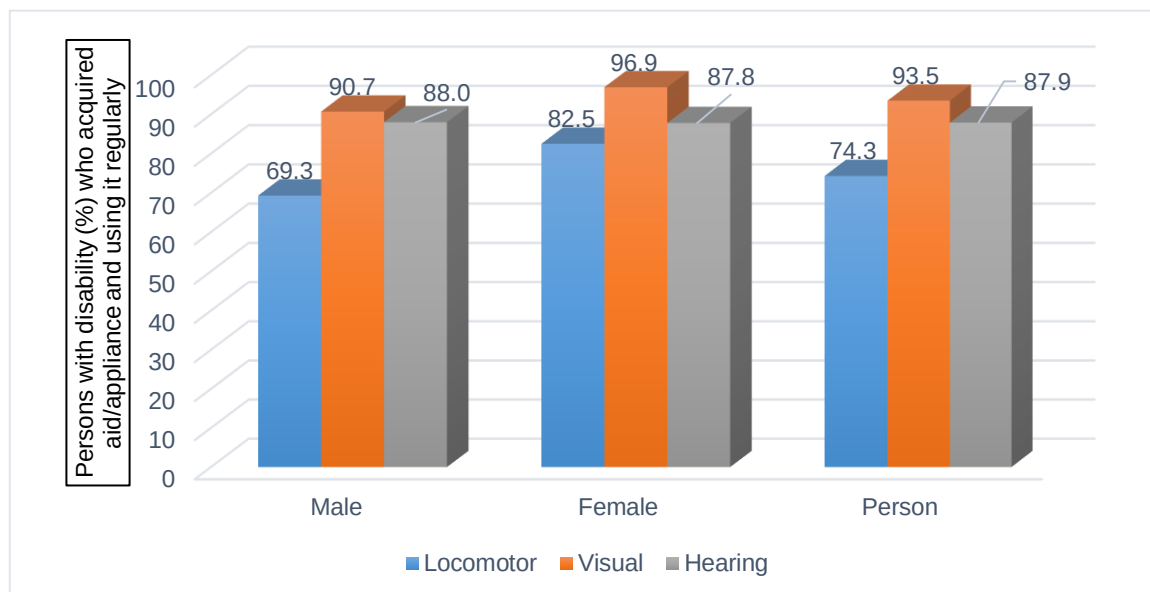

Figure3: Percentage of persons with locomotor disability, visual disability, and hearing disability who acquired aid/appliances and used it regularly

4.7 Extent of personal assistance required in doing daily activities and extent of disability

Information on extent of personal assistance required in doing daily activities was collected for persons with locomotor disability, visual disability, mental retardation/intellectual disability, mental illness and other type of disabilities. For persons with hearing disability and speech and language disability, information on extent of disability was collected.

Statement-23:

Percentage distribution of persons with locomotor disability by extent of personal assistance required in doing daily activities				
Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons with locomotor disability by the extent of personal assistance	Always required personal assistance in doing daily activities	18.9	24.6	20.8

	Did not require personal assistance in doing daily activities	44.2	33.6	40.6
	All	100.0	100.0	100.0

Note: Refer Tables 34.1, 34.2 and 34.3 in Annexure 26.0

Note: Regarding the extent of personal assistance, each person with a locomotor disability was categorized in any one of the following (i) who always required personal assistance in doing daily activities, (ii) sometimes required personal assistance in doing daily activities and (iii) did not require personal assistance in doing daily activities.

Statement-23 represents that among persons with locomotor disability, 40.6% of persons did not require any personal assistance in doing daily activities. And the lowest percentage of persons i.e. 21.9% of persons always required personal assistance.

Statement-24:

Percentage distribution of persons with visual disability by extent of personal assistance required in doing daily activities				
Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons With visual disability by the extent of personal assistance	Always required personal assistance in doing daily activities	26.3	24.4	25.5
	Sometimes required personal assistance in doing daily activities	31.7	39.7	34.7
	Did not require personal assistance in doing daily activities	42.0	35.9	39.8
	All	100.0	100.0	100.0
		Urban		
Percentage distribution of persons With visual disability by the extent of personal assistance	Always required personal assistance in doing daily activities	31.3	14.8	25.4
	Sometimes required personal assistance in doing daily activities	21.9	44.7	30.1
	Did not require personal assistance in doing daily activities	46.7	40.5	44.5
	All	100.0	100.0	100.0
		All		
Percentage distribution of persons With visual disability by the extent of personal assistance	Always required personal assistance in doing daily activities	26.9	23.3	25.5
	Sometimes required personal assistance in doing daily activities	30.5	40.3	34.1
	Did not require personal assistance in doing daily activities	42.6	36.4	40.3
	All	100.0	100.0	100.0

Note: Refer Table – 34.1, Table-34.2, Table-Table-34.3 in Annexure 26.0

Note: Regarding the extent of personal assistance, each person with a visual disability was categorized in any one of the following

- (i) who always required personal assistance in doing daily activities
- (ii) sometimes required personal assistance in doing daily activities and
- (iii) did not require personal assistance in doing daily activities.

Statement-24 displays that 25.5 % of persons with visual disability always required personal assistance, while 34.1% of persons sometimes required personal assistance and 40.3 % of persons did not require any personal assistance in doing daily activities.

Statement-25:

Percentage distribution of persons with mental retardation/intellectual disability by extent of personal assistance required in doing daily activities				
Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons with mental retardation/ intellectual disability by extent of personal assistance	Always required personal assistance in doing daily activities	35.3	34.3	34.9
	Sometimes required personal assistance in doing daily activities	39.5	28.7	36.1
	Did not require personal assistance in doing daily activities	25.2	37.0	29.0
	All	100.0	100.0	100.0
		Urban		
Percentage distribution of persons with mental retardation/ intellectual disability by extent of personal assistance	Always required personal assistance in doing daily activities	59.3	31.3	25.4
	Sometimes required personal assistance in doing daily activities	22.6	3.1	30.1
	Did not require personal assistance in doing daily activities	18.1	65.6	44.5
	All	100.0	100.0	100.0
		All		
Percentage distribution of persons with mental retardation/ intellectual disability by extent of personal assistance	Always required personal assistance in doing daily activities	26.9	33.6	35.9
	Sometimes required personal assistance in doing daily activities	30.5	22.9	32.6
	Did not require personal assistance in doing daily activities	42.6	43.5	31.4
	All	100.0	100.0	100.0

Note: Refer Table – 34.1, Table-34.2, Table-Table-34.3 in Annexure 26.0

Note: 1.Regarding the extent of personal assistance, each person with mental retardation/intellectual disability was categorized in any one of the following (i) who always required personal assistance in doing daily activities, (ii) sometimes required personal assistance in doing daily activities and (iii) did not require personal assistance in doing daily activities.

Statement 25 indicates that 35.9% of people always required personal assistance, 32.6% sometimes required personal assistance, and 31.4% did not require any personal assistance in daily activities.

Statement-26:

Percentage distribution of persons with mental illness disability by extent of personal assistance required in doing daily activities				
Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons with mental illness disability by the extent of personal assistance	Always required personal assistance in doing daily activities	23.2	41.0	30.6
	Sometimes required personal assistance in doing daily activities	51.6	31.1	43.1
	Did not require personal assistance in doing daily activities	25.2	27.9	26.3
	All	100.0	100.0	100.0
		Urban		
Percentage distribution of persons with mental illness disability by the extent of personal assistance	Always required personal assistance in doing daily activities	39.9	36.5	39.0
	Sometimes required personal assistance in doing daily activities	46.5	24.0	41.1
	Did not require personal assistance in doing daily activities	13.7	39.5	19.9
	All	100.0	100.0	100.0
		All		
Percentage distribution of persons with mental illness disability by the extent of personal assistance	Always required personal assistance in doing daily activities	25.5	40.7	31.5
	Sometimes required personal assistance in doing daily activities	50.9	30.6	42.8
	Did not require personal assistance in doing daily activities	23.6	28.7	25.6
	All	100.0	100.0	100.0

Note: Refer Table – 34.1, Table-34.2, Table-Table-34.3 in Annexure 26.0

Note: Regarding the extent of personal assistance, each person with mental illness was categorized in any one of the following

- (i) who always required personal assistance in doing daily activities,*
- (ii) sometimes required personal assistance in doing daily activities and*
- (iii) did not require personal assistance in doing daily activities.*

Statement-26 reveals that 42.8% of persons sometimes required personal assistance, where as 31.5% of persons always required personal assistance and 25.6% of persons did not require any personal assistance in doing daily activities.

Statement- 27:

Percentage distribution of persons with other types of disability by extent of personal assistance required in doing daily activities				
Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons with other types of disability by extent of personal assistance	Always required personal assistance in doing daily activities	31.3	19.9	30.6
	Sometimes required personal assistance in doing daily activities	37.9	40.8	43.1
	Did not require personal assistance in doing daily activities	30.7	39.3	26.3
	All	100.0	100.0	100.0
		Urban		
Percentage distribution of persons with other types of disability by extent of personal assistance	Always required personal assistance in doing daily activities	27.6	13.2	18.5
	Sometimes required personal assistance in doing daily activities	12.0	39.0	29.1
	Did not require personal assistance in doing daily activities	60.4	47.8	52.4
	All	100.0	100.0	100.0
		All		
Percentage distribution of persons with other types of disability by extent of personal assistance	Always required personal assistance in doing daily activities	31.0	18.7	25.0
	Sometimes required personal assistance in doing daily activities	35.4	40.5	37.9
	Did not require personal assistance in doing daily activities	33.6	40.9	37.1
	All	100.0	100.0	100.0

Note: Refer Table – 34.1, Table-34.2, Table-Table-34.3 in Annexure 26.0

Note: Regarding the extent of personal assistance, each person with other types of disability was categorized in any one of the following

- (i) who always required personal assistance in doing daily activities,*
- (ii) sometimes required personal assistance in doing daily activities and*
- (iii) did not require personal assistance in doing daily activities.*

Statement 27 reveals the percentage of persons who sometimes required personal assistance i.e. 37.9 % is higher than the percentage of persons who always required personal assistance i.e. 25.0% in doing daily activities.

Statement -28:

Percentage distribution of persons with Blindness by the extent of personal assistance required in doing daily activities				
Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons with blindness by the extent of personal assistance	Always required personal assistance in doing daily activities	30.5	29.0	30.0
	Sometimes required personal assistance in doing daily activities	27.1	30.0	28.2
	Did not require personal assistance in doing daily activities	42.4	41.0	41.9
	All	100.0	100.0	100.0
		Urban		
Percentage distribution of persons with blindness by the extent of personal assistance	Always required personal assistance in doing daily activities	38.4	34.2	37.5
	Sometimes required personal assistance in doing daily activities	16.7	31.8	20.1
	Did not require personal assistance in doing daily activities	44.9	34.0	42.4
	All	100.0	100.0	100.0
		All		
Percentage distribution of persons with blindness by the extent of personal assistance	Always required personal assistance in doing daily activities	31.6	29.4	30.9
	Sometimes required personal assistance in doing daily activities	25.6	30.1	27.2
	Did not require personal assistance in doing daily activities	42.7	40.5	41.9
	All	100.0	100.0	100.0

Note: Refer Table - 34.1, Table- 34.2 and Table- 34.3 in Annexure-26.0

In Statement 28, the percentage of blind persons who did not require personal assistance i.e. 41.9% is higher than the percentage of blind persons who sometimes require personal assistance i.e. 27.2% in doing daily activities.

Statement -29:

Percentage distribution of persons with Low Vision by the extent of personal assistance required in doing daily activities				
Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons with low vision by the extent of personal assistance	Always required personal assistance in doing daily activities	17.5	15.8	16.8
	Sometimes required personal assistance in doing daily activities	41.0	57.9	47.6
	Did not require personal assistance in doing daily activities	41.5	26.3	35.6
	All	100.0	100.0	100.0
		Urban		
Percentage distribution of persons with low vision by the extent of personal assistance	Always required personal assistance in doing daily activities	0	0	0
	Sometimes required personal assistance in doing daily activities	45.3	54.6	51.1
	Did not require personal assistance in doing daily activities	54.7	45.4	48.9
	All	100.0	100.0	100.0
		All		
Percentage distribution of persons with low vision by the extent of personal assistance	Always required personal assistance in doing daily activities	16.3	13	14.9
	Sometimes required personal assistance in doing daily activities	41.3	57.3	48.0
	Did not require personal assistance in doing daily activities	42.4	29.6	37.1
	All	100.0	100.0	100.0

Note: Refer. Table 34.1, Table 34.2 and Table 34.3 in Annexure 26.0

In Statement 29, the percentage of persons with low vision who sometimes required personal assistance i.e.48.0% is higher in comparison to the percentage of persons with low vision who always required personal assistance i.e. 14.9% in doing daily activities.

Statement-30:

Percentage distribution of persons with hearing disability by extent of hearing disability				
Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons with hearing disability by the extent of personal assistance	Can not hear or can only hear loud sounds	49.5	53.6	51.1
	Can hear only shouted words	29.2	27.6	28.5
	Have other hearing difficulty	21.3	18.8	20.3
	All	100.0	100.0	100.0
		Urban		
Percentage distribution of persons with hearing disability by the extent of personal assistance	Can not hear or can only hear loud sounds	26.2	58.7	38.2
	Can hear only shouted words	61.3	22.7	47.1
	Have other hearing difficulty	12.5	18.6	14.7
	All	100.0	100.0	100.0
		All		
Percentage distribution of persons with hearing disability by the extent of personal assistance	Can not hear or can only hear loud sounds	46.7	54.1	49.6
	Can hear only shouted words	33.1	27.1	30.7
	Have other hearing difficulty	20.3	18.8	19.7
	All	100.0	100.0	100.0

Note: Refer Table-35 in Annexure 26.0

Note: 1. Each person with a hearing disability was categorized in any one of the following

- (i) who cannot hear or can only hear loud sounds,*
- (ii) who can hear only shouted words and*
- (iii) who have other hearing difficulty.*

In Statement 30, among persons with hearing disability almost 50% of persons cannot hear or can only hear loud sounds. On the other hand, 19.7% of persons have other hearing difficulties which is lower than that of other extents.

Statement-31:

Percentage distribution of persons with speech and language disability by extent of speech and language disability				
Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons with speech and language disability by the extent of personal assistance	Can not speak	44.3	44.0	44.2
	Can speak only single words or speaks unintelligibly	36.7	42.0	38.6
	Have other speech and language difficulty	19.0	13.9	17.2
	All	100.0	100.0	100.0
		Urban		
Percentage distribution of persons with speech and language disability by the extent of personal assistance	Can not speak	35.7	35.4	35.6
	Can speak only single words or speaks unintelligibly	44.3	30.9	40.3
	Have other speech and language difficulty	19.9	33.7	24.0
	All	100.0	100.0	100.0
		All		
Percentage distribution of persons with speech and language disability by the extent of personal assistance	Can not speak	43.4	43.4	43.4
	Can speak only single words or speaks unintelligibly	37.4	41.2	38.8
	Have other speech and language difficulty	19.1	15.4	17.8
	All	100.0	100.0	100.0

Note: Refer Table 36 in Annexure 26.0

Note: 1. Each person with speech and language disability was categorized in any one of the following

- (i) who cannot speak,
- (ii) who can speak only single words or speaks unintelligibly and
- (iii) who have other speech and language difficulties.

Statement-31 reveals that out of the persons with speech and language disability percentage of persons who cannot speak at all i.e. 43.4% is higher whereas the percentage of persons who have other speech and language difficulties i.e. 17.8% is minimal.

4.8 Receipt aid/help, difficulty in accessing/using public transport & public buildings, and certificate of disability

For persons with disability information was collected on receipt of aid/help, use of public transport and problems faced in accessing/using public transport, access of public buildings and problems faced in accessing/using public buildings, availability of certificate of disability, etc. Indicators on these are presented in this section.

Statement- 32:

Accessing/using public transport and public buildings for persons with disability				
Indicator		Male	Female	Person
		Rural		
Percentage of persons with disability	Who used public transport during the period of the last 365days preceding the date of survey	63.2	57.3	61.0
	Who used public transport during the period of the last 365 days preceding the date of the survey and faced difficulties/using it	66.8	70.9	68.2
	Whoaccessedpublicbuildingduringaperiodoflast365daysprecedingthe date of survey	29.5	21.6	26.6
	Whoaccessedpublicbuildingduringaperiodoflast365 days preceding the date of the survey and faced difficulties in accessing/ using it	64.8	60.7	63.6
		Urban		
Percentage of persons with disability	Who used public transport during the period of the last 365days preceding the date of survey	68.4	53.2	62.3
	Who used public transport during the period of the last 365 days preceding the date of the survey and faced difficulties/using it	71.5	59.7	67.5
	Whoaccessedpublicbuildingduringaperiodoflast365daysprecedingthe date of survey	36.5	25.8	32.2
	Whoaccessedpublicbuildingduringaperiodoflast365 days preceding the date of the survey and faced difficulties in accessing/ using it	69.3	49.4	62.9
		All		
Percentage of persons with disability	Who used public transport during the period of the last 365days preceding the date of survey	63.8	56.7	61.2
	Who used public transport during the period of the last 365 days preceding the date of the survey and faced difficulties/using it	67.4	69.5	68.1
	Whoaccessedpublicbuildingduringaperiodoflast365daysprecedingthe date of survey	30.4	22.2	27.3
	Whoaccessedpublicbuildingduringaperiodoflast365 days preceding the date of the survey and faced difficulties in accessing/ using it	65.4	58.9	63.5

Note: Refer to Table-37.1,37.2,37.3,38.1,38.2 and 38.3 in Annexure 26.0

Note: For each person with disability, information on the use of public transport, and the use of public buildings was collected separately.

From statement 32 we observe that the percentage of persons who used public transport during a period of the last 365 days preceding the date of the survey and faced difficulties in accessing/ using it is higher than the percentage of persons who simply used public transport for the mentioned period. The same interpretation is applicable for public buildings.

Statement- 33:

Percentage distribution of persons with disability by receipt of aid/help and percentage of persons with disability having a certificate of disability				
Indicator		Male	Female	Person
		Rural		
Percentage distribution of persons with disability by receipt of aid/help	Received aid/help from the Government	17.9	18.8	18.3
	Received aid/help from organizations other than government	16.8	15.6	16.3
	Did not receive aid/help	65.3	65.6	65.4
	All	100.0	100.0	100.0
Percentage of persons with disability having a certificate of disability		34.9	34.9	34.9
		Urban		
Percentage distribution of persons with disability by receipt of aid/help	Received aid/help from the Government	10.5	15.0	11.8
	Received aid/help from organizations other than government	20.2	9.6	17.2
	Did not receive aid/help	69.3	75.4	71.0
	All	100.0	100.0	100.0
Percentage of persons with disability having a certificate of disability		45.6	37.8	42.6
		All		
Percentage distribution of persons with disability by receipt of aid/help	Received aid/help from the Government	16.1	18.3	17.0
	Received aid/help from organizations other than government	17.6	14.7	16.5
	Did not receive aid/help	66.3	67.0	66.5
	All	100.0	100.0	100.0
Percentage of persons with disability having a certificate of disability		36.2	35.3	35.9

Note: Refer to Table-30.1,30.2,30.3,40.1,40.2 and 40.3 in Annexure 26.0

Note: 1. For each person with a disability it was ascertained whether they received aid/help and from the information collected, each person is classified as either receiving aid/help from the Government, or from an organisation other than the Government or did not receive aid/help. If a household member received aid or help from more than one source or more than one type, then the one which the person considered most important for him/her was considered.

2. For each person with a disability, information was collected on whether having a certificate of disability.

3. Information on receipt of aid/help and certificate of disability was collected separately.

In Statement 33, we have observed that the percentage of persons with disability who did not receive aid/help i.e. 66.5% is higher than the percentage of persons with disability who received aid/help from the government which is only 17%. Also, the percentage of disabled persons having a certificate of disability in the urban area i.e. 42.6% is higher than in rural areas which is 34.9%.

Figure 4: Percentage distribution of persons with disability by receipt of aid/help for Male

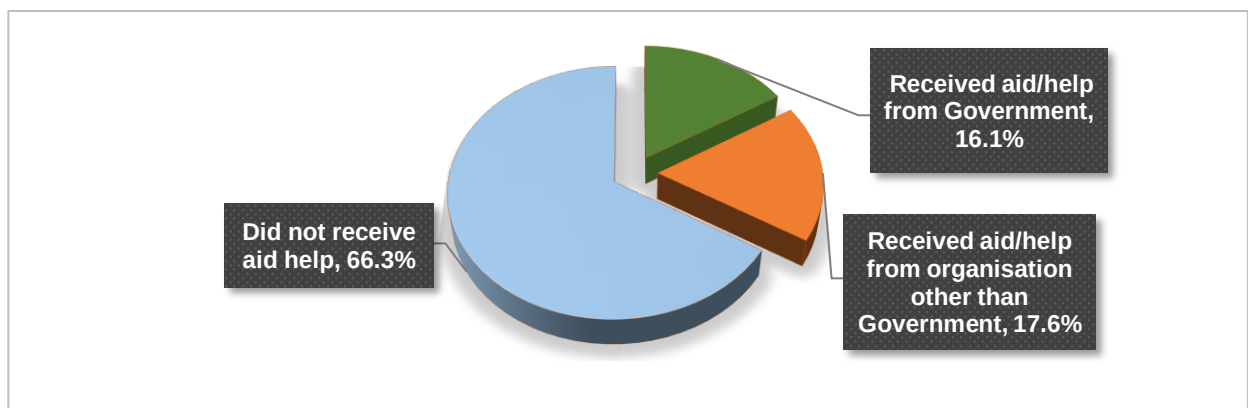

Figure5: Percentage distribution of persons with disability by receipt of aid/help for Female

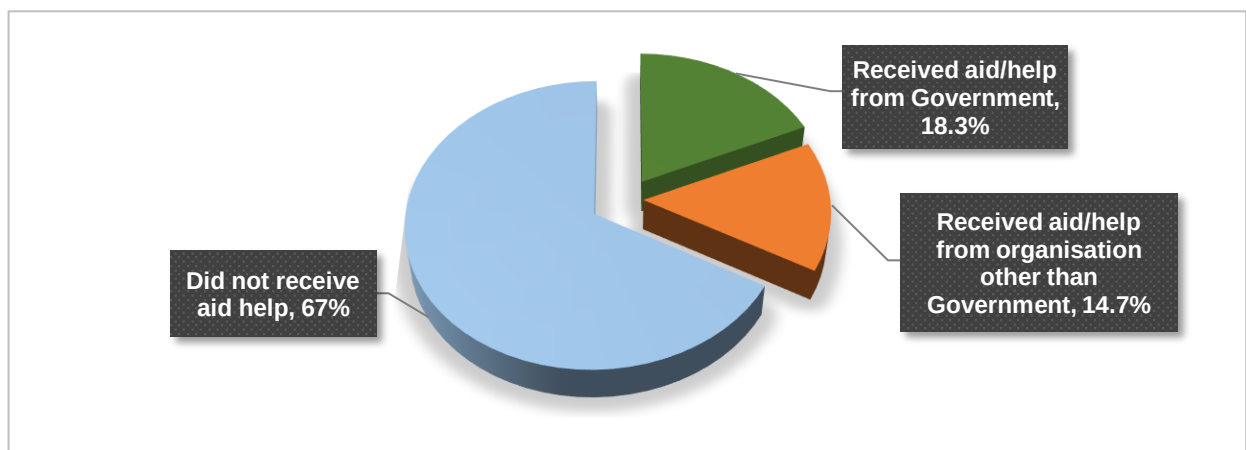

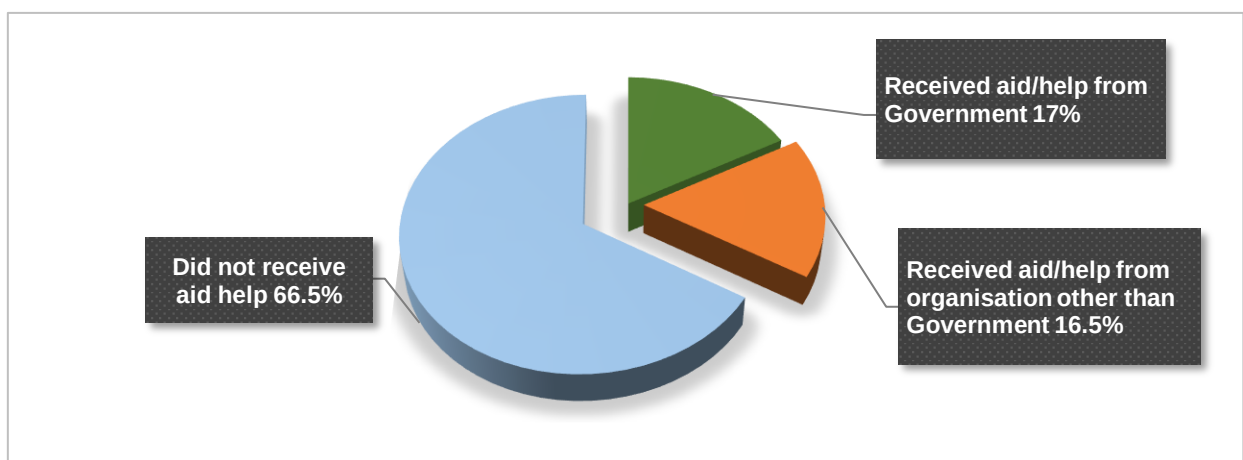

Figure 6: Percentage distribution of persons with disability by receipt of aid/help for all persons

4.9 Loss or change of work due to disability

For each person of age 15 years and above with disability, it was ascertained whether he/she was working before the onset of disability. For those who were working before the onset of disability, it was ascertained whether disability caused loss or change of work. For persons with two or more disabilities who were working before the onset of each of the disabilities, more than one of the situations—'loss of work', 'change or change of work' – might have occurred. In such cases, 'loss of work' was given priority over 'change of work' and 'no loss or change of work'. Similarly, 'change of work' was given priority over 'no loss or change of work'. Estimates on these aspects are presented in this section.

Statement- 34:

Percentage of persons of age 15 years and above with disability who were working before the onset of disability and their percentage distribution by the situation of loss/change of work caused by disability				
Indicator		Male	Female	Person
Rural				
Percentage of persons with disability of age 15 years and above who were working before the onset of disability		29.7	16.0	24.6
Percentage distribution of persons with disability of age 15 years and above who were working before the onset of disability by the situation of loss/change of work due to disability	Loss of work	58.3	50.8	56.4
	Change of work	18.4	14.7	17.5
	No loss or change of work	23.3	34.5	26.1
	All	100.0	100.0	100.0
Urban				
Percentage of persons with disability of age 15 years and above who were working before the onset of disability		4.6	13.6	29.5
Percentage distribution of persons with disability of age 15 years and above who were working before the onset of disability by the situation of loss/change of work due to disability	Loss of work	45.9	35.6	44.0
	Change of work	25.5	59.0	31.8
	No loss or change of work	28.6	5.4	24.2
	All	100.0	100.0	100.0
All				
Percentage of persons with disability of age 15 years and above who were working before the onset of disability		31.0	15.7	25.2
Percentage distribution of persons with disability of age 15 years and above who were working before the onset of disability by situation of loss/change of work due to disability	Loss of work	56.4	49.0	54.6
	Change of work	19.4	19.9	19.6
	No loss or change of work	24.2	31.1	25.8
	All	100.0	100.0	100.0

Note: Refer Table-39.1, 39.2 and 39.3 in Annexure 26.0

Note: 1. For each person with disability of age 15 years and above, information was collected on whether working before the onset of disability.

2. For each person with disability of age 15 years and above who were working before the onset of disability, information on situation of loss/change of work was collected as (i) disability caused loss of work or (ii) change of work or (iii) no loss or change of work and each of such person with disability was classified in any one of these three categories.

Statement 34 depicts that about 25.2% of persons of age 15 years and above with disability were working before the onset of disability. Among those persons with disability who were working before the onset of disability, about 54.6% had lost their work and 19.6% had changed their job due to onset of disability. Whereas, 25.8% of disable persons had no loss or change of work.

4.10 Out-of-pocket expenditure on disability

For each person with disability, information on out-of-pocket expenses on disability was collected. This information was collected in terms of infrequent expenditure on disability during last 365 days (separately for medical and non-medical expenditure) and usual monthly expenditure on disability (separately for medical and non-medical expenditure).

Statement-35:

Out-of-pocket expenditure on disability			
Indicator	Male	Female	Person
	Rural		
Percentage of persons with disability incurring out-of-pocket expenses	44.5	46.8	45.4
Average monthly out-of-pocket expenses per person with disability who incurred out-of-pocket expenses on disability(Rs.)	1127	875	1032
	Urban		
Percentage of persons with disability incurring out-of-pocket expenses	52.2	50.6	51.5
Average monthly out-of-pocket expenses per person with disability who incurred out-of-pocket expenses on disability (Rs.)	2045	1707	1911
	All		
Percentage of persons with disability incurring out-of-pocket expenses	45.5	47.3	46.1
Average monthly out-of-pocket expenses per person with disability who incurred out-of-pocket expenses on disability (Rs.)	1252	997	1156

Note: Refer to Table 41 in Annexure 26.0

The estimates on out-of-pocket expenditure on disability are presented in Statement 35. As many as 46.1% of persons with disability were incurring out of pocket expenses. The average monthly out of pocket expenses per person with a disability who incurred out-of-pocket expenses on disability was estimated as Rs.1156/- in the state of Assam.

Figure 7: Percentage of persons with disability who incurred expenditure on disability

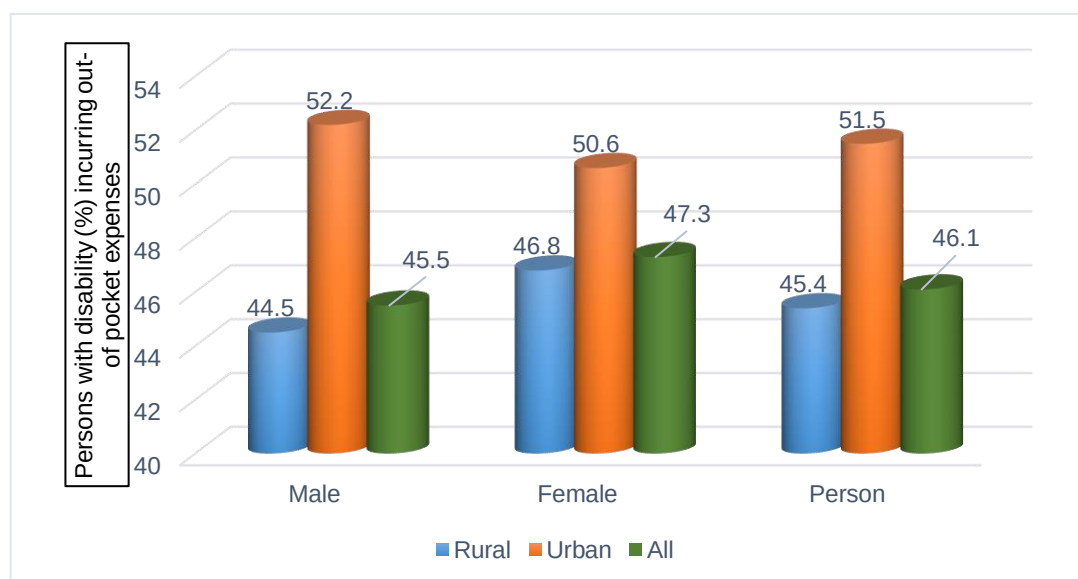

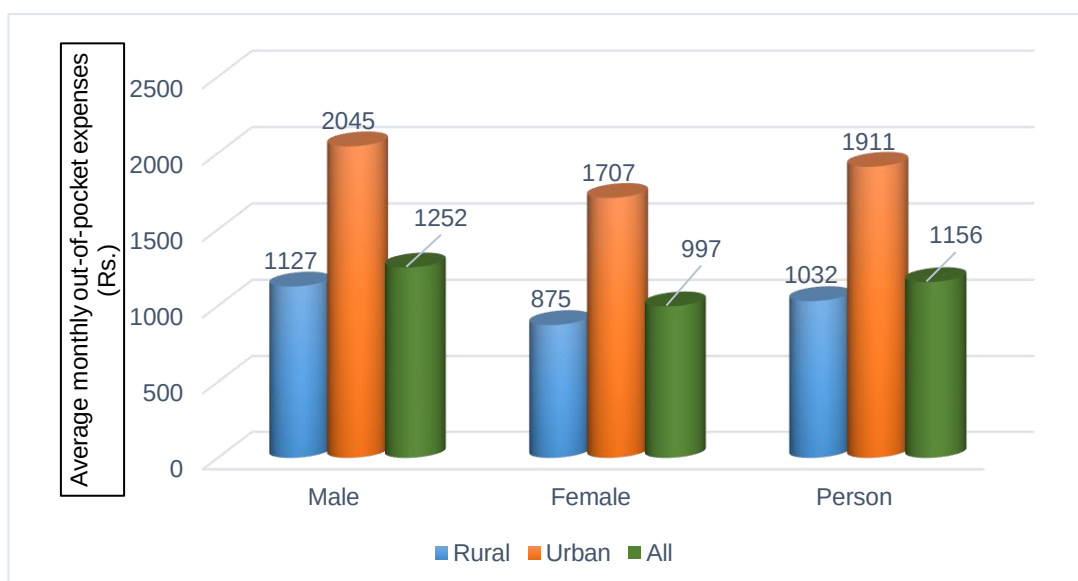

Figure 8: Average monthly out-of-pocket expenses (Rs.) per person with disability who incurred out-of-pocket expenses on disability

4.11 Indicators on employment and unemployment status among persons of age 15 years and above with disability in usual status (ps+ss)

For persons of age 15 years and above with disability, information was collected on usual activity status, industry of work and for the regular wage/salaried persons in the non-agriculture sector, the enterprise type in which the person was working. On the basis of information collected in usual status, key labour force indicators are represented in this section in usual status (ps+ss) along with, distribution of workers by broad status in employment (self-employed, regular wage/salaried employment and casual labour), distribution of workers in broad industries (agriculture sector, secondary sector and tertiary sector) and the share of informal sector among the regular wage/salaried person in the non- agriculture sector.

Statement-36:

Indicators of employment and unemployment among persons of age 15 years and above with disability in usual status (ps+ss)			
Indicator	Male	Female	Person
	Rural		
Labour Force Participation Rate (LFPR in per cent) among persons with disability	37.0	8.1	26.2
Worker Population Ratio(WPR in percent) among persons with disability	36.4	7.3	25.5
Unemployment Rate (UR in percent) among persons with disability	1.7	10.3	2.7
	Urban		
Labour Force Participation Rate (LFPR in per cent) among persons with disability	39.8	9.8	27.5
Worker Population Ratio(WPR in percent) among persons with disability	35.8	7.4	24.2
Unemployment Rate (UR in percent) among persons with disability	10.0	24.6	12.1
	All		
Labour Force Participation Rate (LFPR in per cent) among persons with disability	37.4	8.4	26.4
Worker Population Ratio (WPR in percent) among persons with disability	36.4	7.3	25.4
Unemployment Rate(UR in percent)among persons with disability	2.7	12.5	3.9

Note: Refer Table-46.1b, 46.2b and 46.3b in Annexure 26.0

Note: Usual status (ps+ss) is determined considering usual principal status and subsidiary economic activities together

Statement 36 given above shows the indicators of employment and unemployment persons of 15 years and above with disability in usual status. Labour Force Participation (LFPR) among persons with disability in Assam was estimated as 26.4%. Worker population ratio was 25.4%. Whereas, 3.9% of persons with disability were reported to be unemployed in state Assam.

Statement37:

Percentage distribution of workers in usual status (ps+ss) with disability of age 15 years and above by broad status in employment, by broad industry of work and percentage share of informal sector among regular wage/salaried employees with disability of age 15 years and above in non-agriculture sector				
Indicator		Male	Female	Person
Rural				
Percentage distribution of persons in usual status (ps+ss) with disability of age 15 years and above by broad status in Employment	All Self Employed	27.0	3.9	18.3
	Regular wage/Salaried employee	2.2	1.0	1.7
	Casual labour	7.3	2.5	5.5
	Unemployed	0.6	0.8	0.7
	Not in the labour force	62.9	91.8	73.8

Percentage distribution of workers in usual status (ps+ss) With disability of age 15 years and above by broad industry of work	Agriculture sector	51.1	53.5	51.4
	Secondary sector	14.0	26.3	15.3
	Tertiary sector	34.9	20.2	33.3
	All	100.0	100.0	100.0
Percentage of regular wage/salaried employees in usual status (ps+ss) of age 15 Years and above with disability engaged in the non-agriculture sector who were working in the informal sector		6.1	0.0	5.2

Note: Refer to Table-47.1, 47.2, 47.3, 48.1, 48.2 and 48.3 in Annexure 26.0

Note: 1. Informal sector: Proprietary and partnership enterprises are considered here as the informal sector. Agriculture sector: NIC-2008 codes 01-03, secondary sector: NIC-2008 codes 05-43, tertiary sector: NIC-2008 codes 45-99. Usual status (ps+ss) is determined considering the usual principal status and subsidiary economic activities together.

Statement 37 is presented for workers in usual status with disability of age 15 years and above by broad activity status. Among the persons with disability aged 15 years and above who were employed, 18 % were reported to be all self-employed, 2.2 % regular wage/salaried and 5.2 % casual labour in usual activity status (ps+ss). Significantly, more than 50% of Workers were engaged in the Agriculture sector. Next to that 33.3% of workers with a disability were engaged in the Tertiary sector (33.3 %), whereas 15.3 % were engaged in the Secondary sector. Further 5.2 % of persons with disability with regular wage/salaried jobs were engaged in non-agricultural informal sector.

Annexure: 26.0

Schedule 26: Survey of Persons with Disability

Table No	Description	Page No
1	Number of villages/ blocks, households and persons surveyed for State Assam	A1
2	Percentage distribution of households by type of response	A1
3	Estimated number of households, persons (000), average household size (0.0) and sex ratio (no. of female per 1000 of male) for Assam	A1
4	Number of persons surveyed in each category of disability	A2
5	Estimated (00) number of persons in each category of disability	A3
6	Estimated (00) number of persons in each broad type of disability considering only one broad type of disability	A4
7	Number of persons surveyed in each broad type of disability	A5
8	Estimated number of persons in each broad type of disability	A6
9	Percentage (0.0) distribution of persons by broad type of disability different age groups considering only one broad type of disability	A7-A9
10	Percentage (0.0) distribution of persons by broad type of disability for each age group	A10-A12
11	Percentage (0.0) distribution of persons by broad type of disability for each household social group considering only one broad type of disability	A13-A15
12	Percentage (0.0) distribution of persons by broad type of disability for each household social group	A16-A18
13	Percentage (0.0) distribution of persons by broad type of disability for each household religious group considering only one broad type of disability	A19-A22
14	Percentage (0.0) distribution of persons by broad type of disability for each household religious group	A23-A26
15	Percentage (0.0) distribution of persons by broad type of disability for each quintile class of usual monthly per capital consumer expenditure (UMPCE) considering only one broad type of disability	A27-A29
16	Percentage (0.0) distribution of persons by broad type of disability for each quintile class of usual monthly per capital consumer expenditure (UMPCE)	A30-A32
17	Percentage (0.0) distribution of persons by the blood-relation of the parents for each broad type of disability	A33-A35
18	Percentage (0.0) distribution of households by number of persons with disability in the household	A36
19	Literacy rate (in per cent) of persons of age 7 years and above	A37
20	Percentage (0.0) distribution of persons of age 15 years and above by highest level of education	A38-A41
21	Percentage (0.0) distribution of persons with multiple disability for each broad type of disability	A42-A45
22	Percentage (0.0) distribution of persons with disability by age at	A46-A48

	onset of disability for each age-group and broad type of disability	
23	Percentage (0.0) of persons with locomotor disability for different causes of locomotor disability	A49-A51
24	Percentage (0.0) of persons with visual disability for different causes of visual disability	A52-A60
25	Percentage (0.0) of persons with hearing disability for different causes of hearing disability	A61-A63
26	Percentage (0.0) of persons with speech and language disability for different causes of speech and language disability	A64-A66
27	Percentage (0.0) of persons with different broad type of disability due to 'burn or injury other than burn' in different places of occurrence of the disability	A67-A69
28	Percentage (0.0) of persons with locomotor disability with different disability area	A70
29	Percentage (0.0) of persons with disability by status of treatment taken for different broad type of disability	A71-A125
30	Percentage (0.0) of persons with disability for different status of advice of aid/appliances and percentage (0.0) of persons who acquired aid/ appliances for different methods of acquiring aid/appliances	A126-A128
31	Percentage (0.0) of persons with locomotor disability who acquired aid/appliances with different types of aid/appliances	A129-A130
32	Percentage (0.0) distribution of persons with visual disability who acquired aid/appliances by type of aid/appliances	A131-A136
33	Percentage (0.0) distribution of persons with hearing disability who acquired aid/appliances by type of aid/appliances	A137
34	Percentage (0.0) distribution of persons with different broad type of disability by extent of personal assistance required in doing daily activities	A138-A140
35	Percentage (0.0) distribution of persons with hearing disability by extent of hearing disability	A141
36	Percentage (0.0) distribution of persons with speech and language disability by extent of speech and language disability	A142
37	Percentage (0.0) distribution of persons with different broad type of disability by difficulties faced in accessing/using public transport	A143-A145
38	Percentage (0.0) distribution of persons with different broad type of disability by difficulty faced in accessing public building	A146-A148
39	Percentage (0.0) distribution of persons with disability of age 15 years and above who were working before the onset of disability by situation of loss or change of work due to disability	A149-A151
40	Percentage (0.0) of persons with disability having certificate of disability and distribution of those having certificate of disability by percentage of disability as per certificate	A152-A154
41	Percentage of persons (P) with disabilities incurring out-of-pocket expenses and average monthly out-of-pocket expenses (A) (in whole number of Rupees) per person with disability incurring expenditure on disability	A155
42	Percentage (0.0) distribution of persons with disability of age 3 to 35 years by enrolment status for each type of disability	A156-A158
43	Percentage (0.0) distribution of persons with different broad type of disability of age 3 to 35 years by enrolment status for each type of disability	A159-A161
44	Percentage (0.0) distribution of persons with disability of age 3 to 35 years by level of current educational attendance	A162
45	Percentage (0.0) distribution of persons with disability of age 3 to 35 years who are not enrolled in special school/ not attending in	A163

	special school by reason for non-enrolment/ not attending	
46	Percentage (0.0) distribution of persons with different broad type of disability by activity status in usual status (ps+ss)	A164-A221
47	Percentage (0.0) distribution of usually working persons with different broad type of disability of age 15 years and above in usual status (ps+ss) by industry of work	A222-A224
48	Percentage (0.0) distribution of regular wage/salaried employees in usual status (ps+ss) in the non-agricultural sector (NIC code 05-99) of age 15 years and above with different broad type of disability by enterprise type	A225-A227
49	Percentage (0.0) distribution of regular wage/salaried employees of age 15 years and above in usual status (ps+ss) in the non-agricultural sector (NIC 05-99) with different broad type of disability by availability of social security benefits	A228-A230
50	Percentage (0.0) distribution of persons of age 15-59 years with different broad type of disability by vocational/technical training received for each type of disability	A231-A233
51	Percentage (0.0) distribution of persons with disability in the age group 15-59 years who received formal vocational/technical training by field of training for each broad usual activity status (ps+ss)	A234-A236
52	Percentage (0.0) distribution of persons with disability in the age group 15-59 years who received formal vocational/technical training by type of training and duration of training	A237
53	Percentage (0.0) distribution of persons with disability in the age group 15-59 years who received formal vocational/technical training by source of funding	A238
54	Percentage distribution of sample households in each State/UT by time taken to canvass Schedule 26	A239
55	Percentage of filled in schedules (Schedule 26) with remarks	A239
